

Winning the Battle Against Spam

Comprehensive Antispam Protection

Spam is More Than a Nuisance

While primarily thought of as a nuisance that impacts productivity, spam also consumes significant network bandwidth and in many cases carries dangerous viruses, inappropriate content, bots, spyware and other malware that can cause service outages and create legal / compliance issues. Furthermore, sophisticated phishing schemes are often employed that can lead to the loss of confidential data or the theft of goods or services. Winning the battle against spam requires a comprehensive set of capabilities that utilizes a multi-layered security suite.

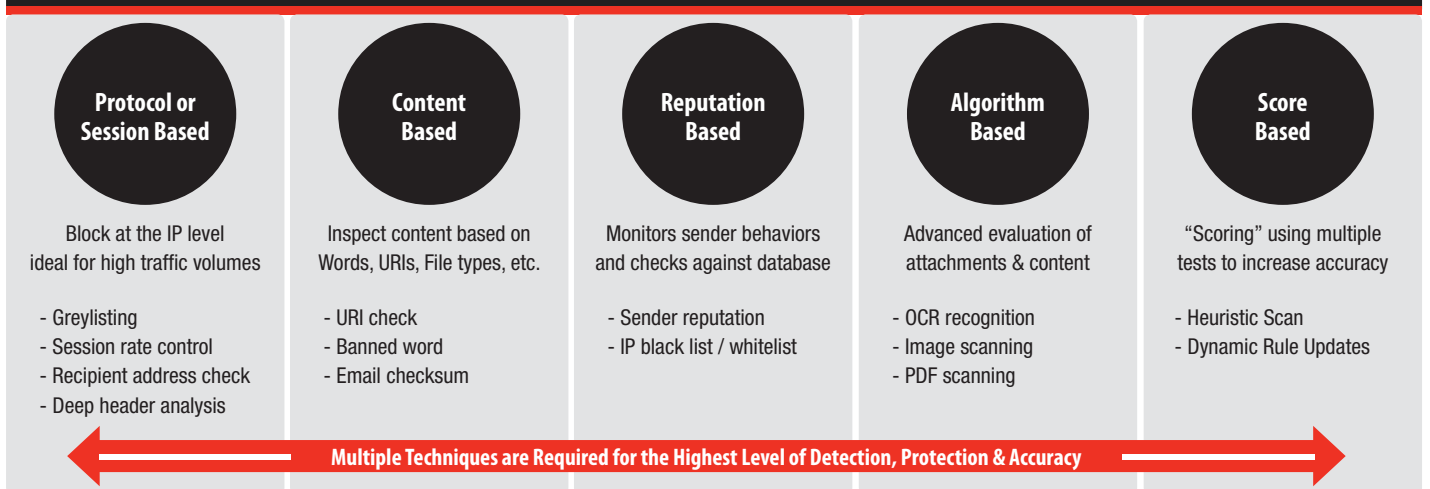

EFFECTIVE ANTISPAM PROTECTION IS CRITICAL

Antispam Techniques

Spammers use a wide variety of methods to circumvent antispam techniques, such as spoofing e-mail/IP addresses, forging header information, exploiting open mail relays/proxy servers, using image-based spam and utilizing networks (Botnets) of malware-infected PCs (zombies) to send their spam. Achieving the highest degree of spam detection accuracy requires multiple-detection technologies and multi-pass detection mechanisms.

Various Antispam Techniques

Fortinet Antispam Solutions

Fortinet's FortiMail™, FortiGate™, FortiClient PC™ and FortiClient Mobile™ product families provide complete antispam detection and protection for email servers, networks and PC/mobile devices. All products are developed in-house by Fortinet and do not rely on 3rd party technology or external services enabling Fortinet to deliver industry-leading antispam coverage, response and accuracy. Using a global network of spam probes Fortinet research and development teams maintain highly accurate and up-to-date spam databases. The FortiGuard™ Antispam service uses these databases to continuously updates the multiple antispam inspection engines used in Fortinet's products and to provide the highest-level of spam protection.

Fortinet Antispam and Multi-Layered Security Solutions

FortiMail and FortiGate Solutions

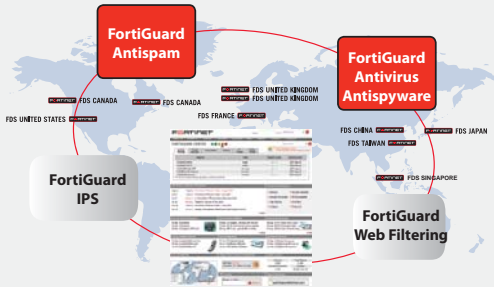

- Multiple antispam inspection engines ensure accuracy
- No reliance on third-party technologies/subscriptions
- Comprehensive logging, archiving & reporting

FortiClient PC / FortiClient Mobile

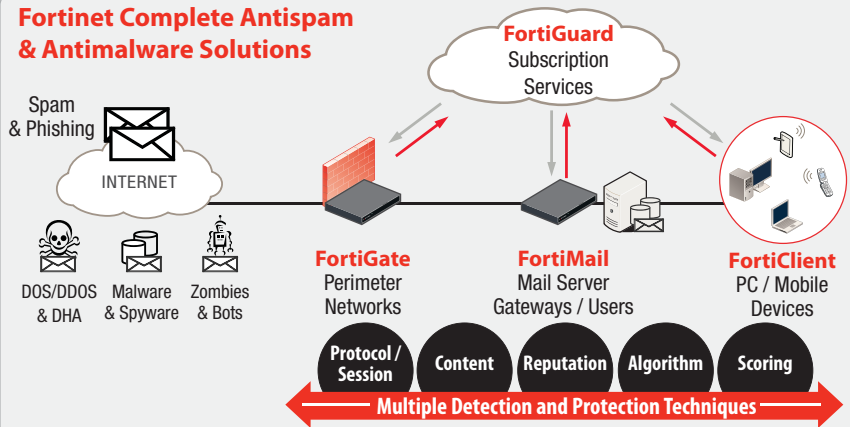

- For Windows, Windows Mobile and Symbian OS's
- Provides SMS antispam for mobile smart phones
- Automatically updated via FortiGuard Network

FortiGuard Services

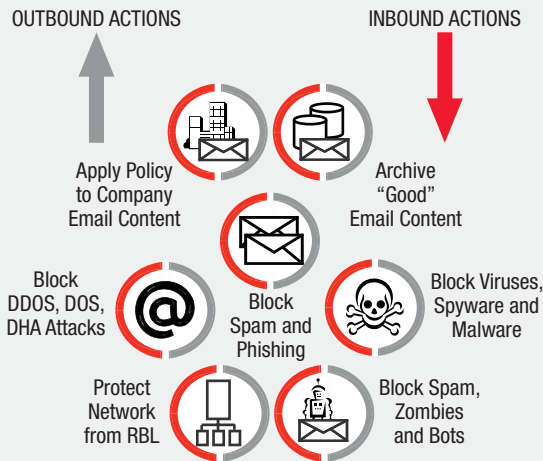

- Industry leading antispam coverage and accuracy
- Global spam probes, spam honeypots & monitors
- Low admin overhead - FortiGuard automatic updates

Fortinet Complete Antispam & Antimalware Solutions

Key Antispam Features

FortiClient End Point Security

- Antispam Filters
- FortiGuard Antispam Service
- IP/Address Black/White List
- Email Quarantine

FortiGate UTM Security

- Antispam Filters
 - FortiGuard Antispam Service
 - IP/Address Black/White List
 - Return Email DNS Check
 - Email Quarantine*
 - Email Archive*
- * Requires FortiAnalyzer

FortiMail Dedicated Email Security

Deployment Modes

Gateway, Transparent, or Server for ultimate flexibility

Antispam Filters

- FortiGuard Antispam Service
- IP/Address Black/White List
- Greylisting
- SMTP Protocol Check
- Return Email DNS Check
- Recipient Address Check - Incoming
- Session Rate Limit
- Forged IP Scanning
- Deep Header Scanning
- Image Analysis
- Heuristics Filtering
- Local Sender Reputation
- Bayesian Filtering
- Dictionary
- PDF file Scanning
- Email Quarantine
- Email Archive
