

Firewall Accelerated

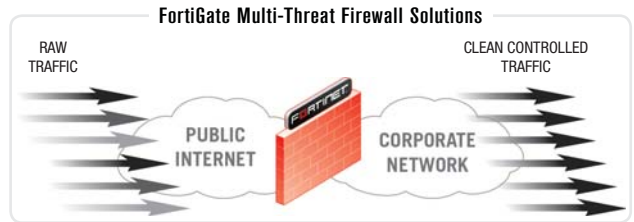

**ASIC Accelerated
Firewall Solutions**

Building a Comprehensive Enterprise Security Architecture

Firewalls are the basic foundation of a comprehensive enterprise security architecture. Selecting a purpose-built security platform that provides modular multi-threat security capabilities will provide the highest level of protection and performance at the lowest total cost of ownership.

Fortinet's industry-leading FortiGate™ multi-threat security systems deliver unmatched integrated security capabilities, ease of use and price/performance.

Along with a stateful Firewall, FortiGate systems can employ an arsenal of dynamic security modules to quickly identify and block a wide spectrum of attacks and malicious activity. Security modules can be used separately or together allowing IT administrators to build comprehensive security solutions architected for unique network requirements. Using network-based ASIC-accelerated hardware platforms, combined with Fortinet's award winning FortiOS™, Fortinet delivers the highest level of multi-threat security and industry-leading performance at a lower total cost of ownership.

Babcock and Brown (investment firm with 26 offices worldwide managing more than \$30 billion in assets)

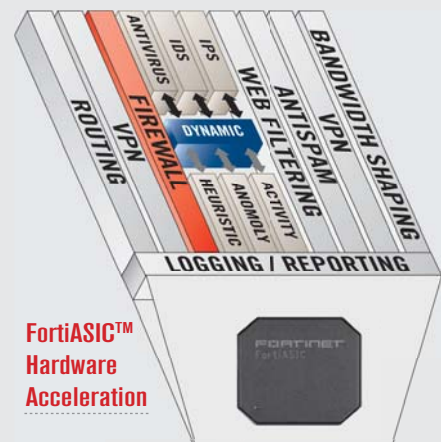

"The ease of use and integrated functions of the Fortinet offering were the key factors in our buying decision. "The FortiGate solution will help us avoid having to manage multiple vendors and appliances in order to have the security functions and protection that we require."

– John Kaberna, Global Network Information Security Manager

Checklist: Firewall Selection Criteria

- | | |
|---|--|
| <input type="checkbox"/> Integration and Modularity | <ul style="list-style-type: none"> ✓ Integrated platform that supports modular addition of functions such as IPS, AV and AS ✓ Flexible and easy deployments for varying network topologies including Transparent, NAT, route modes |
| <input type="checkbox"/> Performance and Reliability | <ul style="list-style-type: none"> ✓ Hardware acceleration and virtual domains or route modes enables a lower total cost of ownership (TCO) ✓ Purpose-built platforms that utilize a security hardened OS and high availability configurations |
| <input type="checkbox"/> Application-Level Security | <ul style="list-style-type: none"> ✓ Protects networks against blended attacks including protocol support for VOIP, IM and P2P applications ✓ Provides policy-based traffic shaping and support for multicast traffic |
| <input type="checkbox"/> On-Going Protection | <ul style="list-style-type: none"> ✓ Industry's award-winning threat protection database that has been independently tested and verified ✓ 24x7 global threat research labs that provide real-time security updates |
| <input type="checkbox"/> Cost to Own, Operate & Maintain | <ul style="list-style-type: none"> ✓ Includes hardware, software and security subscription services with no per user pricing ✓ Consolidate vendors with no additional equipment to buy, manage and support |

FortiOS Modular Multi-Layered Security Suite

FortiGate Security Platforms

- Integrated / Modular Security Solutions
- Highest Level of Performance & Reliability
- Low Total Cost of Ownership

Fortinet Sets the Standard

Fortinet's industry-tested FortiGate Firewalls meet enterprise requirements for scalability, performance and reliability. Advanced security capabilities such as integrated antivirus, IPS, antispam and URL filtering along with high-availability, hardware-accelerated performance, and security zones are available on all FortiGate models. In addition, Fortinet's broad portfolio of FortiGate models offers a device to fit into any sized network while Fortinet's FortiManager™ system provides a single interface to centrally manage and easily deploy thousands of FortiGate systems.

Deployment Flexibility

- Dynamic Routing Protocols RIP, OSPF, BGP
- Transparent, NAT, Route Modes
- Virtual Security Domains and Zones
- Support for Multicast Traffic

Platform Family

- Enterprise and Branch Office
- Multi-Store Retail Deployments
- MSSP Managed Firewall Service
- SOHO DSL/Cable Deployments

Complete Customer Care

- FortiCare Support & Technical Account Management
- FortiCare Professional Services
- FortiGuard Subscription Services
- Global Threat Research Labs

SC Magazine's 2007 Reader Trust Awards

FortiGate systems awarded "Best Intrusion Detection and Prevention (IPS) Solution" and "Best Integrated Security Solution" for the second consecutive year. (Feb 12, 2007)

Pizza Hut Korea

"We evaluated a number of options, but were most impressed with the wide range of security features and centralized management functionality of the FortiGate systems. Additionally, the ASIC-based systems deliver superior performance, even in high-traffic, high-transaction based environments like ours."

– Mr. Jaemin Kil, MIS Manager Korea

Industry Leadership

- Consistently Ranked as Industry Leading Security Vendor
- Rated as Fastest Growing Major Security Vendor (IDC)
- More Than 200,000 Security Appliances Shipped

Since 2001 Fortinet Has Received over 80 Awards
