

Controlling Enterprise Web Access

Web Filtering Solutions

Best-of-Breed Web Filtering and Multi-Threat Security

Email, messaging and Web services are essential tools that have changed the way businesses operate. With all the benefits of these services there also come new challenges. Inappropriate use of these services negatively impacts worker productivity and businesses may face legal liability for employee actions. At the same time business assets are vulnerable and easily damaged, stolen or leaked. A sophisticated Web filtering solution is required that accurately classifies Web URL, protocol and application threats and provides real-time protection and reporting. Ideally this capability would be a modular component within a multi-layered security solution in order to optimize protection, performance and cost.

• "The comprehensive antivirus scanning offered by the FortiGate devices is second to none, and delivers superb protection on behalf of our incredibly large and increasing customer base. In addition to superb functionality and reliability, the FortiGate appliances offer an attractive and highly cost-effective per-device licensing model and are fully scalable to accommodate our ever-increasing needs. Fortinet is helping LDL uphold its duty to schools in both the Liverpool and Stockport areas by blocking inappropriate email and web content."

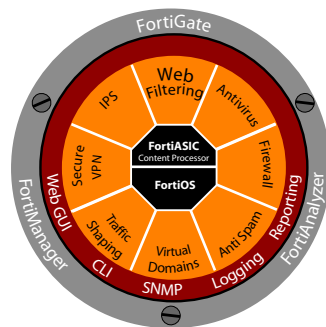

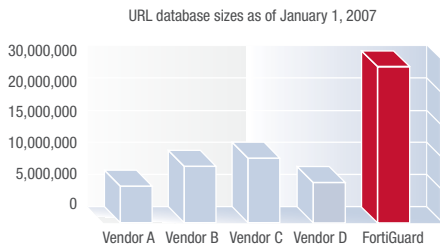

Mark Orford, Head of Technical Architecture and Strategy
 Liverpool Direct Limited (LDL)
 British Telecom (BT) Joint Venture

Fortinet Web Filtering and Multi-Threat Security Solutions

FortiGuard Web Filtering
 Industry Leading Database Coverage

FortiOS
 Modular Multi-Threat Security Suite

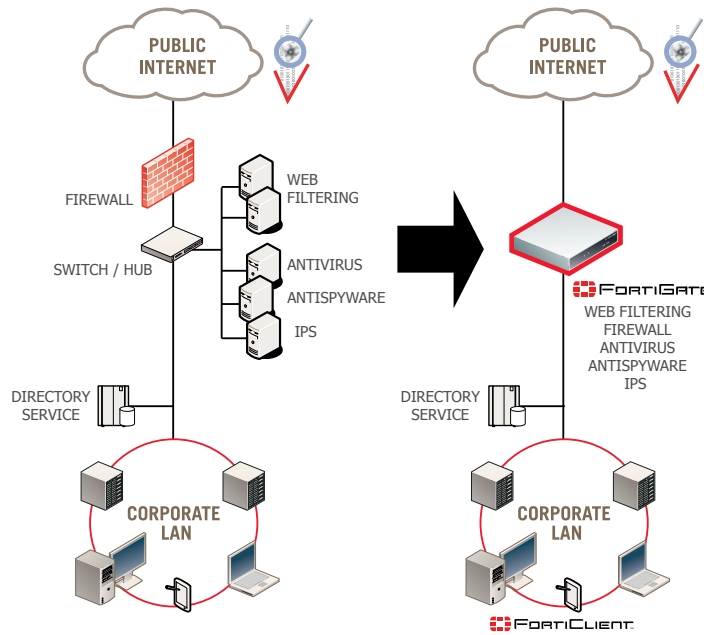

FortiGate
 Integrated Security Platforms

- 26M+ Database with Real-Time Updates
- 76 Categories / 6 Classes / per Policy
- Sophisticated Management & Reporting
- Modular Multi-Threat Security Suite
- Hardware Accelerated Performance
- 24x7 Global Threat Research Labs
- Turn-Key Security Platforms
- Perimeter / Edge / ROBO Deployments
- Device Based Licensing (Not Per User)

Point-Products
 ARRAY OF COSTLY SERVERS
 & MIXED SOFTWARE LICENSES

DEGRADED PERFORMANCE
 DIFFICULT TO DEPLOY / MANAGE

Fortinet Solutions
 PURPOSE-BUILT INTEGRATED PLATFORMS
 FLEXIBLE, MULTI-LAYERED SECURITY

HARDWARE ACCELERATED PERFORMANCE
 EASY TO DEPLOY / MANAGE

Fortinet Web Filtering and Security Solutions vs Leading Competitors

Web Filtering Competitive Checklist

Flexible Security Platform

Fortinet Advantages

- ✓ Provides protection capabilities throughout all aspects of the network (Perimeter, Edge and ROBO)
- ✓ Integrated security platform supports modular addition of functions such as IPS, AV and AS

Point-Product Vendors

- ✗ Most are limited to providing only perimeter Web Filtering level protection only
- ✗ Most provide only Web Filtering functions and others require additional servers or 3rd party equipment

Level of Protection

- ✓ Industry's largest URL database—26M and growing to provide the highest level of accuracy and protection
- ✓ Industry leading response time for categorizing new URLs & providing real-time updates
- ✓ 24x7 global threat research labs that provide expertise in complete security solutions

- ✗ Others average 10M or less and therefore are not as accurate or complete
- ✗ Some fail to categorize URLs in real-time leaving exposure to newly formed risks
- ✗ Focused on Web filtering only and not able to apply end-end security expertise

Control and Performance

- ✓ 76 Categories and 6 Classes for very granular control with per policy enforcement
- ✓ Purpose-built platforms utilize FortiASIC hardware acceleration and FortiOS security hardened OS

- ✗ Fewer categories and less flexible implementation of policy-based enforcement
- ✗ Many use generic PCs that perform poorly and Windows OS which has known security flaws

Cost to Own, Operate & Maintain

- ✓ Includes hardware, software and security subscription services with no per user pricing
- ✓ Costs do not increase as users increase
- ✓ Integrated solution—No additional equipment to buy, manage and support

- ✗ Most price on a per user basis
- ✗ Licensing costs increase as users increase
- ✗ Many require separate / multiple servers to run their software and 3rd party equipment such as firewalls
