Ragnarok enhances security and capabilities with Fortinet firewall

Fortinet, the only provider of ASIC-powered, network-based antivirus firewall systems for real-time network protection, was chosen by Thailand's AsiaSoft to supply a network-based security system for its hugely popular Ragnarok Online game network. AsiaSoft has successfully deployed Fortinet's FortiGate 3000 Antivirus Firewalls across its entire network, enabling a fully-protected playing environment and real-time performance for its more than one million subscribers.
