

Fortifying Ties

Fortinet, a provider of Unified Threat Management (UTM) solutions, recently announced the appointment of Spectrum Edge Sdn. Bhd. as a value added distributor of their integrated network security systems and services. Spectrum Edge will market the whole range of Fortinet products but will give special focus to mid and high-end range products such as the FortiGate-1000, 3000 and 5000 series. Spectrum Edge will also distribute the FortiManager centralized management solution and the FortiAnalyzer centralized logging and reporting system.

At the event, Fortinet also announced the expansion of its FortiGate-3000 Series of multi-threat security appliances with the introduction of two new products – the FortiGate-3810A and the FortiGate-3016B. The new systems are highly scalable and deliver up to 26Gbps of firewall performance. The new appliances are ideally

suited for network core and data center deployments.
