## FORTINET JOINS THE SecureIT ALLIANCE

GAINS ENHANCED RESOURCES AND SUPPORT

**Manila, Philippines** – Fortinet has officially announced that it has become the newest member of the SecureIT Alliance, a group of industry partners working together to develop security solutions. Becoming a member of the alliance now enables Fortinet to collaborate earlier and more interactively with Microsoft and other members of the organization. The Alliance provides a forum through which members can receive new platform information from Microsoft, and collaborate on issues such as secure-code best practices, interoperability, and integration of products and services, as well as public communication of security solutions content.

For Fortinet, the inclusion in this Alliance extends the benefits of Fortinet's fortiGuard Network to customers, by enabling a broader research network and more attention and faster response to critical vulnerabilities and potential threats. FortiGuard provides continuous updates to constantly help protect against the latest threats. For more information, visit **www.fortinet.com**.
