

## New ASICs technology accelerate firewall performance to switching speeds – FortiGate-310B

Fortinet announced the new FortiGate™-310B multi-threat security appliance. By incorporating into the purpose-built FortiASIC™ network processors previously reserved for its high-end product lines, Fortinet is raising the bar on firewall and virtual private network (VPN) throughput performance to gigabit-per-second (Gbps) speeds, and enabling wire-speed firewall performance. Additional benefits provided by the FortiGate-310B appliance include highest-in-class port density of 10 gigabit Ethernet ports, with an additional four gigabit ports made available through an optional Advanced Mezzanine Card (AMC) module.

### 新ASICs技術增防火牆速度 FortiGate-310B

Fortinet推出的中階級FortiGate-310B多重威脅保安設備，由於引入以往只用於高階產品的FortiASIC網絡處理器，從而提升其FW/IPSec VPN吞吐量，分別達到8Gbps和16Gbps。

另外，FortiGate-310B還具備10個千兆以太端口，並通過可加選的Advanced Mezzanine Card (AMC) 模塊多增4個額外的千兆以太端口，達到共14端口，以應付高用量所需。

**Product Info**

- ▲防毒/IPS吞吐量分別為160Mbps及800Mbps
- ▲用戶使用證無限
- ▲於今年第二季推出
