Changing The Security Landscape Together
Delivering the Highest Levels of Security Protection with Unparalleled Performance and Lowest TCO

Today, a global threat marketplace collaborates and innovates to attack organizations with continually increasing levels of sophistication and complexity. The Fortinet – Hewlett Packard Enterprise (HPE) Alliance is a highly strategic partnership enabling both companies to join forces to combine advanced technologies with best-in-class expertise to provide comprehensive and innovative security solutions to the market. The Fortinet – HPE Alliance provides a strong and complete suite of network and application security solutions, integrating hardware, software and services to offer the highest levels of security protection available on the market today.

Fortinet: A Leader In High-Performance Network Security

Fortinet protects the most valuable assets of some of the largest enterprise, service provider and government organizations across the globe. The company’s fast, secure and global cyber security solutions provide broad, high-performance protection against dynamic security threats while simplifying the IT infrastructure. They are strengthened by the industry’s highest level of threat research, intelligence and analytics. Unlike pure-play network security providers, Fortinet can solve organizations’ most important security challenges, whether in networked, application or mobile environments – be it virtualized/cloud or physical. More than 300,000 customers worldwide, including some of the largest and most complex organizations, trust Fortinet to protect their brands.

Fortinet - HPE Alliance: Global in Reach, Comprehensive in Scope

Through integration of Fortinet’s innovative and high-performance security products with HPE’s broad and global range of industry-leading solutions and services, the Fortinet - HPE Alliance offers differentiated products, solutions and services to protect organizations with the highest levels of security protection in a business environment in constant change. The Alliance further extends Fortinet and HPE’s leadership position in enhancing the security of networks and providing customers with the deployment choices and flexibility they require.
