Fortinet Secure SD-WAN has caught the attention of industry analysts. Our unique Security-Driven Networking solution consolidates security and networking in one FortiGate hardware appliance or virtual machine.

FortiGate appliances deliver the world's only ASIC-accelerated secure SD-WAN solutions. This transforms the WAN experience by delivering high-performance, reliable, and secure connectivity with self-healing capabilities and scalability without compromising security. Fortinet Secure SD-WAN is the only solution that truly integrates SD-WAN, next-generation firewall (NGFW), advanced routing, and ZTNA access proxy functions. Nearly 35,000 organizations are realizing the benefits of a unified WAN edge with our solution.

The Fortinet Secure SD-WAN solution empowers IT teams to:

- **Deliver superior quality of experience (QoE)** at scale with seamless, reliable, and high-performance connectivity to applications (regardless of location) and self-healing capabilities.
- **Build simpler and faster secure networks** with consolidated networking, security, advanced routing, and ZTNA access proxy.
- **Improve operational efficiencies** with automation of configuration, deployment, orchestration of policies, analytics, and reporting using Fabric Management Center.

In addition, organizations can realize business benefits that include up to:\[1]

![Graph](image)

- **10x** Higher productivity and superior user experience
- **99%** Increased business uptime and reduced risk
- **65%** Lower total cost of ownership

“Fortinet has been a long-time leader in the network security market, which has enabled them to deliver a solution that tightly knits advanced security features with SD-WAN. Though Fortinet is best known as a security company, they have shown their strength and innovation in networking as one of the top SD-WAN solutions on the market capable of supporting enterprise digital transformation.”\[2

Frost & Sullivan
Roopa Honnachari, VP of Research
Network Services & Edge
Named a Leader for the third year in a row and highest in Ability to Execute for the second year in a row in the 2022 Gartner® Magic Quadrant™ for SD-WAN

Recognized as one of the top SD-WAN vendors in the Frost & Sullivan Frost Radar™: Global SD-WAN Vendor Market, 2021

Received Global SD-WAN Vendor Product Leadership Award by Frost & Sullivan

Fortinet Secure SD-WAN Recognition

Gartner Peer Insights Customers’ Choice

Gartner Peer Insights Customers’ Choice distinctions recognize vendors and products that are highly rated by their customers. The data collected represents a top-level synthesis of vendor software products most valued by IT Enterprise professionals.

Only vendor to rank #1 in 3 of 5 use cases for the second year in a row in the Gartner® Critical Capabilities for SD-WAN report:

- Remote Workers
- Security-sensitive WAN
- WAN for Small Branches

IDC MarketScape: Worldwide SD-WAN infrastructure

IDC MarketScape vendor analysis model is designed to provide an overview of the competitive fitness of ICT suppliers in a given market. The research methodology utilizes a rigorous scoring methodology based on both qualitative and quantitative criteria that results in a single graphical illustration of each vendor’s position within a given market. The Capabilities score measures vendor product, go-to-market and business execution in the short-term. The Strategy score measures alignment of vendor strategies with customer requirements in a 3-5-year timeframe. Vendor market share is represented by the size of the icons.
