Fortinet – Making possible a digital world you can always trust

For over 20 years, Fortinet has been a driving force in the evolution of cybersecurity and the convergence of networking and security. Our network security solutions are the most deployed, most patented, and among the most validated in the industry. Our broad, complementary portfolio of cybersecurity solutions are built from the ground up with integration and automation in mind, enabling more efficient, self-healing operations and a rapid response to known and unknown threats.

Mission: to secure people, devices, and data everywhere

Headquarters: Sunnyvale, CA

Fortinet IPO: November 2009

Founded: October 2000

NASDAQ and S&P 500: FTNT

Key Fortinet Advantages

Security Fabric
Organically developed, highly integrated and automated cybersecurity platform

Security Processors
Superior NGFW and SD-WAN performance and efficiency

FortiGuard
Enterprise class security services across the kill chain, certified effective

The only company to excel at all key stages of network security

Corporate Social Responsibility

A digital world you can always trust is essential to achieving just and sustainable societies. At Fortinet, we believe it is our corporate social responsibility to deliver on that vision by innovating sustainable security technologies, diversifying cybersecurity talent, and promoting responsible business across our value chain.

Innovative for a Safe Internet
Growing an Inclusive Cybersecurity Workforce
Respecting the Environment
Promoting Responsible Business
Digital Innovation Impacts Every Industry

Today’s perimeter is no longer easily defined. Driven by an explosion of new connected devices, 5G/LTE connectivity, hyperscale cloud deployments, “anywhere access” to data and applications, and the recent increase in the remote workforce, the perimeter has expanded across the entire infrastructure, dramatically increasing the attack surface.

Cybersecurity Evolution – Toward a Platform

To secure their digital innovation efforts, organizations have layered on a growing array of point security solutions. However, this approach offers little in terms of meaningful integration and automation. And for many organizations, the resulting vendor sprawl has now grown too difficult to manage and too expensive to maintain. A more cohesive platform approach is now required to stay ahead of today’s rapidly evolving threats while enabling new business initiatives to proceed safely.
The Fortinet Security Fabric

The Fortinet Security Fabric is at the heart of the Fortinet security strategy. It is a platform organically built around a common operating system and management framework to enable broad visibility, seamless integration and interoperability between critical security elements, and granular control and automation.

**Broad**
visibility and protection of the entire digital attack surface to better manage risk.

**Integrated**
solution that reduces management complexity and shares threat intelligence

**Automated**
self-healing networks with AI-driven security for fast and efficient operations.

---

**Broad Portfolio of Solutions to Protect Your Digital Attack Surface**

**Zero Trust Access**
- ZTNA Agent
- Network Access Control
- Authentication
- MFA/Token

**Security-driven Networking**
- Network Firewall
- SD-WAN
- SD-Branch

FortiOS – The foundation of the Security Fabric

FortiOS is the foundation of the Fortinet Security Fabric, converging and consolidating many security and networking technologies and use cases into a simplified, single policy and management framework. The release of FortiOS 7.0 dramatically expands the Fortinet Security Fabric’s ability to deliver consistent security across all networks, endpoints, and clouds.

FortiGuard Labs – Industry-leading Threat Intelligence

Founded in 2002, FortiGuard Labs is Fortinet’s elite cybersecurity threat intelligence and research organization. A pioneer and security industry innovator, FortiGuard Labs develops and utilizes leading-edge machine learning and AI technologies to provide customers with timely and consistently top-rated protection and actionable threat intelligence. Partnering with law enforcement agencies, government organizations, and security vendor alliances worldwide, FortiGuard Labs acts as a driving force to ensure the industry is effectively collaborating to fight emerging global security risks.

Extensive Cybersecurity Ecosystem
470+ Open Ecosystem Integrations

Fabric Connectors (13)
Fortinet-developed deep integrations that automates security operations and policies

Fabric APIs (256)
Partner-developed integrating using Fabric APIs that provide broad visibility with end-to-end solutions

Fabric DevOps (10)
Community-driven DevOps scripts that automate network and security provisioning, configuration, and orchestration

Extended Security Fabric Ecosystem (200+)
Collaboration with threat sharing organizations and integrations with other vendor products

FortiCare Services help thousands of organizations every year to get the most out of their Fortinet Security Fabric solutions. We have over 1,200 experts providing accelerated implementation, reliable assistance, and proactive care through advanced support and professional services to maximize your security and performance.

FortiCare – Expertise At Your Service

Adopting new technologies is not a project with a start and a finish. Instead, it is a journey from design and implementation to optimization, operations, and ongoing management of the solution. Fortinet has you covered every step of the way, freeing up your resources to focus on your business needs.

The SPU Advantage

Fortinet’s Security Processors (SPUs) radically increase the speed, scale, efficiency and value of Fortinet solutions while greatly improving user experience, reducing footprint and power requirements. From entry-level to high-end solutions, SPU-powered Fortinet appliances deliver superior Security Compute Ratings versus industry alternatives.

Security Compute Ratings are benchmarks that compare the performance metrics of Fortinet SPU-based next-generation firewalls to similarly priced solutions from vendors that utilize generic processors for networking and security.

New Product Spotlight: FortiGate 3500F series

Protect hybrid data centers, stop ransomware, and deliver integrated Zero Trust Network Access capabilities.

Training and Certifications

Fortinet NSE Certification Program
The Fortinet Network Security Expert (NSE) Certification Program is an 8-level training and assessment program designed for customers, partners, employees, and IT professionals to help close the cybersecurity skills gap. With over 730,000 security certifications to date, Fortinet delivers expert-level training in local languages online and in over 100 countries and territories worldwide with help from our Authorized Training Centers.

Expanded Free Public NSE Training
Fortinet has opened up our entire self-paced catalogue of advanced Network Security Expert training courses. With over 1.4 million registrations for our free training courses since the beginning of 2020, it has become clear that Fortinet's NSE training is fulfilling a huge need for all levels of security professionals. As such, we are committed to continue offering the entire catalogue of self-paced Network Security Expert training at no cost until we see the skills gap trend reverse.

Security Associate
Develop a foundational understanding of the ever-changing threat landscape and general network security concepts.

Analyst
Develop a detailed understanding of how to implement network security management and analytics.

Security Associate
Discover the types of security products that have been developed to address the threat landscape that was explored in NSE 1.

Specialist
Develop an understanding of the Security Fabric products that augment FortiGate, providing deeper and more comprehensive network security.

Security Associate
Sales training for Fortinet employees and channel partners only.

Professional
Develop the knowledge required to manage the day-to-day configuration, monitoring, and operation of FortiGate devices to support corporate network security policies.

Architect
Develop the knowledge required to integrate Fortinet products into network security solution deployment and administration.

Security Associate

Expert
Demonstrate the ability to design, configure, install, and troubleshoot a comprehensive network security solution in a live environment.

Fortinet Network Security Academy Program
The Fortinet Network Security Academy program provides industry-recognized Fortinet training and certification opportunities to students around the world. Launched in 2016, this innovative, rapidly growing program has already been adopted by 427 academies in 90 countries and territories.

2021 NSE Training Institute Awards
The NSE Training Institute has been recognized by various organizations for our contribution to excellence in cybersecurity training and certification as well as our many programs that help close the cybersecurity skills gap.

Figures as of October 28, 2021
The Engage Partner Program is designed to help partners built a valuable, highly-differentiated security practice that leverages the industry's best solutions to drive customer success. Fortinet's global partner program is driven by three basic concepts:

**Growth Through Technology Differentiation**

Fortinet's breadth of products are tightly integrated into one highly-automated, high-performing platform that spans endpoint, network, and cloud, and includes tools to easily connect with adjacent technologies.

**Business Success with Proven Credibility**

Fortinet's superior technology innovation and industry leading threat intelligence, alongside our customer ratings and independent analyst reports leadership validates and differentiates our partners' offerings.

**Long-term, Sustained Growth**

The Engage Partner Program offers sustained sales, marketing, and executive support so you can grow productive, predictable, and successful relationships. With drivers of growth built into the program, like our Specializations, we provide paths to expertise for solutions that are driving demand in the market – ensuring you are positioned for success.

Fortinet partners with the **BMW i Andretti Motorsport Formula E Team**, with a shared commitment for high performance, reliability and innovation.

Fortinet has teamed up with renowned French skipper Romain Attanasio, who will carry the Fortinet brand all over the world during the Vendée Globe 2024 Challenge.

Fortinet is a channel-centric company that has created a large, global network of trusted advisors that customers can rely on to secure their digital transformation and strategically drive their business growth.
**Analyst Recognition**

Fortinet is recognized as a Leader in 2 Gartner 2020/2021 Magic Quadrant Reports:

- Network Firewalls
- WAN Edge Infrastructure

Fortinet is also recognized in 4 additional Gartner 2020/2021 Magic Quadrant Reports, including a wide range of technologies:

- Web Application Firewall
- SIEM
- Wired and WLAN
- Endpoint Protection Platforms*
- Secure Web Gateway
- Indoor Location Services

And Fortinet is mentioned as a ‘Vendor To Consider’ in 2 additional Gartner 2020/2021 Magic Quadrant Reports:

**Third Party Testing & Certifications**

Fortinet submits its products for impartial, third party performance and effectiveness testing with the most prominent organizations in the industry, with consistent positive results.

- Only vendor with all three VB100, VBSpam, and VBWeb certifications
- Highest “VBSpam+” rating
- Certified in 4 technology areas:
  - Anti-Malware Network
  - Network Firewall
  - IPsec VPN
  - Web Application Firewall
- Business Security Approved
- Antiphishing Approved
- 100% Protection
  - All Test Cases
  - All Signature-independent
  - All Out of the Box

Gartner Peer Insights Customers’ Choice distinctions are based on the ratings of vendors by verified end-user professionals across a variety of industries and from locations around the world. These distinctions take into account both the number of end-user reviews a vendor receives, along with the overall ratings score a vendor receives from those end users.

Fortinet is proud to be named a Gartner Peer Insights Customers’ Choice in several critical areas:

- Network Firewalls
- Wired and Wireless LAN Access Infrastructure
- Email Security
- WAN Edge Infrastructure

See our Gartner Peer Insights reviews and distinctions at [www.gartner.com/reviews](http://www.gartner.com/reviews).

Gartner does not endorse any vendor, product or service depicted in its research publications, and does not advise technology users to select only those vendors with the highest ratings or other designation. Gartner research publications consist of the opinions of Gartner’s Research & Advisory organization and should not be construed as statements of fact. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose. This report last published in 2019 and is provided here for historical purposes.
## Featured Customer and Partner Stories

### Rollins

Leading consumer and commercial services company providing essential pest control and protection to millions of customers in North America.

**Scope:** Improve security posture and enforce uniform security policies across entire network infrastructure consisting of over 700 locations, 2 data centers and multiple private cloud data centers.

**Key Requirements:** Migrate from aging MPLS to SD-WAN for business flexibility, cost reduction, improved network performance, and enhanced user experience.

**Solution:** Fortinet Secure SD-WAN solution, FortiExtender

**Customer Benefits Realized:**
- Improved user experience and increased network speeds by 7-10x
- Reduced costs and outages
- Cut network setup time by 50 percent through a single console

"Fortinet Secure SD-WAN addressed our connectivity, security and management challenges with a comprehensive solution supporting advanced routing, SD-WAN, and security in a single appliance. With integrated SD-WAN functionality and security, we are able to simultaneously improve application performance and our overall security posture. The current state of the world has really re-emphasized the positive impact of Fortinet Secure SD-WAN for us."

- Kevin Morrison, VP, ITC Operations

---

### GTT

A leading, global cloud networking provider to large, global enterprises.

**Scope:** Deliver additional value to customers though global access, security and cloud acceleration services.

**Key Requirements:** Combine global Tier 1 IP network with industry leading SD-WAN and security capabilities.

**Solution:** Fortinet Secure SD-WAN, FortiGuard Services

**Partner Benefits Realized:**
- Ability to securely connect customers’ locations to every application in the cloud.
- Smart, cost-effective connectivity platform with Fortinet Secure SD-WAN.
- Powerful combination of global last mile access with advanced security and application performance.

“Clients rely on GTT to securely connect their locations across the world and to every application in the cloud. Our broad portfolio of SD-WAN service options, that now includes Fortinet, ensures that clients can run their applications with superior security, performance and reliability to support their business goals.”

- Ernie Ortega, Interim CEO & Chief Revenue Officer

---

### Prysmian Group

Prysmian Group is a world leader in energy and telecom cables and systems, with almost 140 years of experience, €11+ billion sales, and ~29,000 employees in over 50 countries and 106 plants.  

**Scope:** Consistent security posture with the highest possible levels of reliability and resilience

**Key Requirements:** Support for a range of connectivity options in different countries and across different types of operations from manufacturing plants within OT environments and research and development centers

**Solution:** FortiGate, FortiGate-VM, FortiManager, FortiAnalyzer, FortiSIEM

**Customer Benefits Realized:**
- Improved flexibility, scalability and management of IT resources
- Enhanced security
- Greater control and visibility of global applications and data

"Within a dynamic cloud-centric architecture such as ours, the key is to have an intelligent, responsive security infrastructure that can adapt to the changing application and service requirements, and so the Fortinet Security Fabric solution, with its integrated event correlation, automation, and centralized management and reporting, was the perfect fit for us."

- Salvatore Lanzilotti, Global Network TELCO Service Manager, Prysmian Group

---

### BMW Motorsport

A division of BMW Group that fields teams for auto racing series around the world, including the Formula E circuit.

**Scope:** Provide a secure environment for remote, real-time power usage sensing and driver guidance—a capability critical to winning Formula E races.

**Key Requirements:** Enable the rapid and easy deployment of a secure virtual private network (VPN) connection between the trackside team member and BMW Motorsport headquarters. Ensure reliable, high-throughput, low-latency connectivity.

**Solution:** FortiGate

**Customer Benefits Realized:**
- Improved racecar performance
- Full compliance with rigorous BMW Group security policies
- 100% uptime since deployment with minimal latency on global WAN connections

“Racing is a fast-changing sport, and our team is very pleased to have a partner that shares our core values. We look forward to continuing to work with Fortinet as our teams race toward future innovations.”

- Stefan Frost, Head of IT, BMW Motorsport
