

Fortinet strives to continuously assess, monitor, and improve our security policies, procedures, and practices to ensure robust supply chain risk management and to deliver products that customers know they can trust.

We actively participate in the certification and product approval programs that Federal agencies rely on when assessing the suitability of cybersecurity products. In addition, the special line of products we sell in the Federal market (our TAA-validated, USG products) are subject to controls that help protect a product's integrity even after it is sold.

FEDERAL CERTIFICATION PROGRAMS
<div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>National Institute of Standards and Technology</p> <p style="background-color: #555; color: white; text-align: center; padding: 5px;">FIPS 140-2 USGv6</p> </div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>National Information Assurance Partnership</p> <p style="background-color: #555; color: white; text-align: center; padding: 5px;">Common Criteria</p> </div> <div style="border: 1px solid black; padding: 5px;"> <p>Defense information Systems Agency</p> <p style="background-color: #555; color: white; text-align: center; padding: 5px;">Unified Capabilities</p> </div>

CYBER PRODUCT APPROVAL PROGRAMS
<div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p style="background-color: #555; color: white; text-align: center; padding: 5px;">National Security Agency</p> <p style="text-align: center;">Commercial Solutions for Classified (CSfC)</p> </div> <div style="border: 1px solid black; padding: 5px;"> <p style="background-color: #555; color: white; text-align: center; padding: 5px;">Department of Homeland Security</p> <p style="text-align: center;">Continuous Diagnostics and Mitigations (CDM)</p> </div>

Learn about our [certified/approved products](#) and our [USG products](#).

To meet the needs of Federal customers, Fortinet participates in federal and international certification programs cited in Federal information security standards. We also participate in key Federal product approval programs. We currently have certified/approved products available in the product families listed below. These certifications/approvals are refreshed on an ongoing basis as we release new versions of our FortiOS and new product models.

	Federal and International Certification Programs				Federal Product Approval Programs	
	NIST FIPS 140-2	National Information Assurance Partnership Common Criteria	Defense Information Systems Agency Unified Capabilities	NIST USGv6	National Security Agency Commercial Solutions for Classified+	Department of Homeland Security Continuous Diagnostics and Mitigation (Phase 3)
FortiGate	✓	✓	✓	✓	✓	✓
FortiManager	✓	✓				✓
FortiAnalyzer	✓	✓				✓
FortiMail	✓	✓				✓
FortiSandbox						✓
FortiAuthenticator						✓
FortiClient	✓					✓

+ Approval categories: traffic filtering firewall, intrusion prevention system, IPsec VPN Gateway

Most products Fortinet sells in the Federal market are what we call USG products. These are products that have been validated for compliance with country of origin requirements set forth in the Trade Agreements Act (TAA). These products are also subject to these controls to enhance supply chain security:

- USG products are specially configured to receive software updates only from designated servers located in the US.
- Technical support for USG products sold to Federal customers that are covered by a FortiCare maintenance plan are provided by US citizens working in a dedicated Technology Assistance Center located in the US.

All USG products are assigned a SKU that ends in –USG.
