The FortiGate 3200D series delivers high performance threat protection and SSL inspection for large enterprises and service providers, with the flexibility to be deployed at the enterprise/cloud edge, in the data center core or internal segments. The multiple high-speed interfaces, high port density, superior security efficacy and high throughput of the 3200D series keeps your network connected and secure.

**Security**
- Identifies thousands of applications inside network traffic for deep inspection and granular policy enforcement
- Protects against malware, exploits, and malicious websites in both encrypted and non-encrypted traffic
- Prevent and detect against known and unknown attacks using continuous threat intelligence from AI powered FortiGuard Labs security services

**Networking**
- Delivers advanced networking capabilities that seamlessly integrate with advanced layer 7 security and virtual domains (VDOMs) to offer extensive deployment flexibility, multi-tenancy and effective utilization of resources
- Delivers high-density, flexible combination of various high-speed interfaces to enable best TCO for customers for data center and WAN deployments

**Performance**
- Delivers industry’s best threat protection performance and ultra-low latency using purpose-built security processor (SPU) technology
- Provides industry-leading performance and protection for SSL encrypted traffic

**Management**
- Includes management console that is effective, simple to use, and provides comprehensive network automation & visibility.
- Provides Zero Touch Integration with Security Fabric’s Single Pane of Glass Management
- Predefined compliance checklist analyzes the deployment and highlights best practices to improve overall security posture

**Certification**
- Independently tested and validated best security effectiveness and performance
- Received unparalleled third-party certifications from NSS Labs

**Security Fabric**
- Enables Fortinet and Fabric-ready partners’ products to provide broader visibility, integrated end-to-end detection, threat intelligence sharing and automated remediation

Deployment

Next Generation Firewall (NGFW)

- Reduce complexity by combining threat protection security capabilities into single high-performance network security appliance
- Identify and stop threats with powerful intrusion prevention beyond port and protocol that examines the actual applications in your network traffic
- Delivers industry’s highest SSL inspection performance using industry-mandated ciphers while maximizing ROI
- Proactively blocks newly discovered sophisticated attacks in real-time with advanced threat protection

Segmentation

- Intent-based Segmentation builds robust security framework while proactively reducing risk, cost and complexity
- Integrates with Security Fabric seamlessly to allow third party solutions and continuous trust assessment and thereby prevent sophisticated attacks
- Protects critical business applications and helps implement any compliance without network redesigns

IPS

- Highly cost-effective mitigation of unpatched vulnerability for hard-to-patch systems such as IOT, ICS, and Scada
- Protect sensitive data to achieve various regulatory compliance such as PCI, HIPPA, PII, GDPR
- Multiple inspection engines, threat intelligence feeds and advanced threat protection options to defend against unknown threats in real-time
- Best of breed intrusion prevention with high-performance SSL inspection

Mobile Security for 4G, 5G and IOT

- SGi LAN security powered by multiple SPU’s to provide high performance CGNAT and accelerate IPv4 and IPv6 traffic
- RAN Access Security with highly scalable and best performing IPSec aggregation and control security gateway (SecGW)
- User plane security enabled by full Threat Protection and visibility into GTP-U inspection
- Signaling security to inspect various protocols such as SCTP, Diameter, GTP-C, SIP and provide protection against attacks
- High-speed interfaces to enable deployment flexibility
Hardware

FortiGate 3200D/3200D-DC

1. USB Management Port
2. USB Port
3. Console Port
4. 2x GE RJ45 Management Ports
5. 48x 10 GE SFP+ / GE SFP Slots

Interfaces

1. USB Management Port
2. USB Port
3. Console Port

Network Processor

Fortinet's new, breakthrough SPU NP6 network processor works inline with FortiOS functions delivering:
- Superior firewall performance for IPv4/IPv6, SCTP and multicast traffic with ultra-low latency down to 2 microseconds
- VPN, CAPWAP and IP tunnel acceleration
- Anomaly-based intrusion prevention, checksum offload and packet defragmentation
- Traffic shaping and priority queuing

Content Processor

The SPU CP8 content processor works outside of the direct flow of traffic, providing high-speed cryptography and content inspection services including:
- Signature-based content inspection acceleration
- Encryption and decryption offloading

10 GE Connectivity for Network Segmentation

High speed connectivity is essential for network security segmentation at the core of data networks. The FortiGate 3200D provides the highest 10 GE port densities in the market, simplifying network designs without relying on additional devices to bridge desired connectivity.

Powered by SPU

- Custom SPU processors deliver the power you need to detect malicious content at multi-Gigabit speeds
- Other security technologies cannot protect against today's wide range of content- and connection-based threats because they rely on general-purpose CPUs, causing a dangerous performance gap
- SPU processors provide the performance needed to block emerging threats, meet rigorous third-party certifications, and ensure that your network security solution does not become a network bottleneck
Fortinet Security Fabric

Security Fabric
The Security Fabric delivers broad visibility, integrated AI-driven breach prevention, and automated operations, orchestration, and response across all Fortinet and its ecosystem deployments. It allows security to dynamically expand and adapt as more and more workloads and data are added. Security seamlessly follows and protects data, users, and applications as they move between IoT, devices, and cloud environments throughout the network. All this is ties together under a single pane of glass management for significantly thereby delivering leading security capabilities across your entire environment while also significantly reducing complexity.

FortiGates are the foundation of Security Fabric, expanding security via visibility and control by tightly integrating with other Fortinet security products and Fabric-Ready Partner solutions.

FortiOS
Control all security and networking capabilities across the entire FortiGate platform with one intuitive operating system. Reduce complexity, costs, and response time with a truly consolidated next-generation security platform.

- A truly consolidated platform with a single OS and pane-of-glass for all security and networking services across all FortiGate platforms.
- Industry-leading protection: NSS Labs Recommended, VB100, AV Comparatives, and ICSA validated security and performance. Ability to leverage latest technologies such as deception-based security.
- Control thousands of applications, block the latest exploits, and filter web traffic based on millions of real-time URL ratings in addition to true TLS 1.3 support.
- Prevent, detect, and mitigate advanced attacks automatically in minutes with integrated AI-driven breach prevention and advanced threat protection.
- Improved user experience with innovative SD-WAN capabilities and ability to detect, contain and isolate threats with Intent-based Segmentation.
- Utilize SPU hardware acceleration to boost security capability performance.

Services

FortiGuard™ Security Services
FortiGuard Labs offers real-time intelligence on the threat landscape, delivering comprehensive security updates across the full range of Fortinet’s solutions. Comprised of security threat researchers, engineers, and forensic specialists, the team collaborates with the world’s leading threat monitoring organizations and other network and security vendors, as well as law enforcement agencies.

FortiCare™ Support Services
Our FortiCare customer support team provides global technical support for all Fortinet products. With support staff in the Americas, Europe, Middle East, and Asia, FortiCare offers services to meet the needs of enterprises of all sizes.

For more information, please refer to forti.net/fortiguard and forti.net/forticare
Specifications

### FORTIGATE 3200D AND 3200D-DC

#### Interfaces and Modules
- 10 GE SFP+/ GE SFP Slots: 48
- GE RJ45 Management Ports: 2
- USB Ports (Client / Server): 1 / 1
- Console Port
- Internal Storage: 2x 480 GB SSD
- Included Transceivers: 2x SFP+ (SR 10GE)

#### System Performance — Enterprise Traffic Mix
- IPS Throughput: 26 Gbps
- NGFW Throughput: 24 Gbps
- Threat Protection Throughput: 15 Gbps

#### System Performance and Capacity
- Firewall Throughput (1518 / 512 / 64 byte, UDP): 80 / 80 / 50 Gbps
- Firewall Throughput (1518 / 512 / 64 byte, UDP): 2.5 Gbps
- Firewall Latency (64 byte, UDP): 3 µs
- Firewall Throughput (Packet per Second): 52 Million
- New Sessions/Second (TCP): 400,000
- Firewall Policies: 200,000

#### IPsec VPN Throughput (512 byte)
- Gateway-to-Gateway IPsec VPN Tunnels: 40,000
- Client-to-Gateway IPsec VPN Tunnels: 150,000

#### SSL-VPN Throughput: 8 Gbps
- Concurrent SSL-VPN Users: 10,000

#### SSL Inspection Throughput (IPS, avg. HTTPS)
- SSL Inspection Concurren Session: 3.5 Million
- SSL Inspection Concurrent Session (IPS, avg. HTTPS): 4.5 Million

#### Application Control Throughput (HTTP(S)K)
- Application Control Throughput: 11 Gbps
- CAP/NAP Throughput (1444 byte, UDP): 22 Gbps

#### Virtual Domains (Default / Maximum)
- Maximum Number of FortiSwitches Supported: 10 / 125
- Maximum Number of FortiAPs: 4,096 / 2,048
- Maximum Number of FortiTokens: 20,000
- Maximum Number of Registered FortiClients: 50,000
- High Availability Configurations: Active / Active, Active / Passive, Clustering

Note: All performance values are “up to” and vary depending on system configuration.

1. IPsec VPN performance test uses AES256-SHA256.
2. IPS (Enterprise Mix), Application Control, NGFW and Threat Protection are measured with Logging enabled.
3. SSL Inspection performance values use an average of HTTS sessions of different cipher suites.
4. NGFW performance is measured with Firewall, IPS and Application Control enabled.
5. Threat Protection performance is measured with Firewall, IPS, Application Control and Malware Protection enabled.

### Optional Accessories

**Rack Mount Sliding Rails**

- SP-FG3040B-RAIL: Rack mount sliding rails for FG-1000C/-DC, FG-12000, FG-15000/DC, FG-3040B/-DC, FG-3100B/-DC, FG-32000/-DC, FG-36000/-DC, FG-37000/-DC, FG-38100/-DC and FG-39500/-DC.

**10 GE SFP+ Transceiver Module, Short Range**

- FG-TRAN-SFP+SR: 10 GE SFP+ transceiver module, short range for all systems with SFP+ and SFP/SFP+ slots.

**10 GE SFP+ Transceiver Module, Long Range**

- FG-TRAN-SFP+LR: 10 GE SFP+ transceiver module, long range for all systems with SFP+ and SFP/SFP+ slots.

**1 GE SFP+ Transceiver Module**

- FG-TRAN-GC: 1 GE SFP LX transceiver module for all systems with SFP and SFP/SFP+ slots.

**1 GE SFP RJ45 Transceiver Module**

- FG-TRAN-SX: 1 GE SFP SX transceiver module for all systems with SFP and SFP/SFP+ slots.

**10 GE SFP+ Active Direct Attach Cable, 10m / 32.8 ft**

- SP-CABLE-ADASFP+: 10 GE SFP+ active direct attach cable, 10m / 32.8 ft for all systems with SFP+ and SFP/SFP+ slots.

**AC Power Supply**

- SP-FG3600C-PS: AC power supply for FG-3000D, FG-31000, FG-32000, FG-36000 and FG-32400.

**DC Power Supply**

- SP-FG1500D-DC-PS: DC power supply for FG-15000/DC, FG-30000/-DC, FG-31000/-DC, FG-32000/-DC.
