

FortiGuard Threat Intelligence Service

Customized Security Insight

It's a struggle to keep pace with constantly evolving threats especially with attacks becoming more automated, placing a heavy burden on CISO's to prove the effectiveness of existing security controls and processes.

Unfortunately, internal threat data collection and assessment is labor intensive and expensive, and potentially ineffective, especially with the shortage of cybersecurity talent.

Fortinet's new solution strengthens your organization's security posture against emerging threats. Our intelligence-driven approach provides customized security insight of your organization with FortiGuard global threat research that helps security staff determine resource prioritization or tune security policies to best protect against cyber threats.

Internal Threat Visibility

Discover threats tailored for your organization to help with response prioritization.

Intelligent Defense

Improve your organizational security posture by applying machine and human intelligence to your security controls and security processes for all components to function.

Global Intelligence

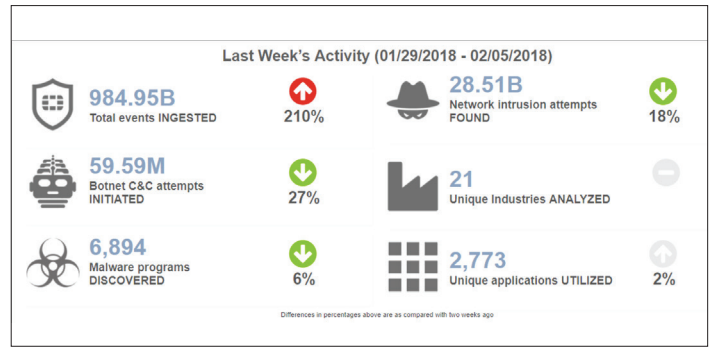

Gain additional insight to threat behavior, characteristics, and attackers TTPs by leveraging research from FortiGuard Labs.

Highlights

- Powerful Trends — insight to security risks specific to your organization on a weekly basis
- Rich Analytics — provides statistical threat ranking via analysis of data from 3.6 million Fortinet security appliances shipped worldwide
- Custom Threat Intelligence — apply big data analysis to your specific security environment
- Security Research — integrated expert research from FortiGuard Labs staffed with more than 215 dedicated threat researchers and analysts studying and responding to the evolving threat landscape
- Easy Access — anytime, anywhere access to a cloud-hosted portal

FEATURES

Threat Prioritization

FortiGuard Threat Intelligent Service integrates threat analytics with local intelligence and FortiGuard research to enhance the effectiveness of your security processes and tools. This is achieved by applying big data solution to raw security information that is layered with contextual intelligence and threat risk levels to accelerate response times.

Equally important, it improves the efficiency of a lean security staff by eliminating noise and amplifying serious threats.

Adopting a Proactive Security Posture

FortiGuard Threat Intelligence Service empowers organizations to evaluate their security posture at a glance so corrective actions can be taken rapidly.

In addition, organizations can trend on prevalent attack characteristics that serve as a KPI for cybersecurity defense and as regular guidance to board level and executive discussions.

ORDER INFORMATION
