FortiMail™ Cloud
Hosted Email Security

FortiMail Cloud Email Security is an independently validated and top-rated Secure Email Gateway solution delivering >99.5% spam detection rate, multiple layers of malware detection and an extremely low false positive rate. It includes analyst recommended Advanced Threat Defense Capabilities as well as a full complement of data protection features. Fully managed by Fortinet, FortiMail Cloud Email Security allows you to focus on your business by relying on a trusted security expert to manage this key infrastructure security component.

### Requirement
<table>
<thead>
<tr>
<th>Requirement</th>
<th>What Fortinet Cloud Security Delivers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Market-leading spam detection</td>
<td>FortiMail delivers highly accurate spam detection (99.97% June 2018(^1)) via the use of multiple fully integrated, advanced detection techniques. These include FortiGuard Antispam, sender reputation, URL analysis and more.</td>
</tr>
<tr>
<td>Top-rated Threat Prevention</td>
<td>FortiMail cloud security scans inbound and outbound email for malware using FortiGuard Antivirus — consistently top-rated by Virus Bulletin — together with cloud sample lookups and real-time outbreak protections.</td>
</tr>
<tr>
<td>Independently Certified</td>
<td>Customers benefit from Fortinet’s NSS Labs Recommended FortiSandbox, plus new Content Disarm and Reconstruction, Click Protection and Impersonation Analysis for the very highest degree of protection.</td>
</tr>
<tr>
<td>Advanced Threat Defense</td>
<td></td>
</tr>
<tr>
<td>Fully-managed service</td>
<td>The FortiMail Cloud service is a fully-managed service backed by 24x7 support across the globe.</td>
</tr>
<tr>
<td>Encryption options</td>
<td>Server to server encryption via TLS encryption ensures data privacy where possible. For enhanced security, Identity-Based Encryption option can be added to deliver secure messaging all the way to the recipient’s desktop.</td>
</tr>
</tbody>
</table>

### Highlights

- Top-rated antispam with sender, connection and content level inspection
- Award-winning FortiGuard outbreak protection, Antimalware with emulation, unpacking, Click Protection and more
- FortiGuard URL detection for phishing, malware and adult content URLs
- Impersonation Analysis and other techniques to thwart business email compromise
- Integration with either FortiSandbox on-premises or FortiSandbox Cloud

### Deployment Modes

- **Gateway** — Route your email to Fortinet where it is cleaned of malware and spam and forwarded onwards to your mail servers.
- **Server** — Host your email infrastructure and security with Fortinet while benefiting from malware and spam protection as well as protection of sensitive information.

### Third-Party Certifications

- Independently validated (VBSpam, VB100, NSS Labs)
- >99.5% spam detection rate
- 99.999% service availability
