

# FortiToken™ Cloud

Two-Factor Authentication Made Easy

With cloud management and user-friendly FortiToken Mobile Tokens included, FortiToken Cloud includes everything you need to implement two-factor in your FortiGate environment.

Many of today's most damaging security breaches have been due to compromised user accounts and passwords. Businesses of all sizes are looking to move beyond passwords alone to authenticate users. Adding a second factor to the authentication process, whether with traditional hardware, or increasingly through mobile device application, has become the new normal. In the past, implementing and managing two-factor deployments could be complex. FortiToken Cloud offers a secure, effective way to manage two-factor authentication for our FortiGate through an easy to understand, intuitive interface that can be accessed from anywhere. Best of all, our FortiToken Cloud service includes our FortiToken Mobile App with PUSH technology, simplifying the end user two-factor experience to a swipe or click to accept.

## Centrally manage two-factor authentication for FortiGate

Administrators or Managed Service Providers can administer two-factor authentication for one or many FortiGate security appliances from a web interface.

## No additional hardware or software required

Designed for FortiGate, FortiToken Cloud Service requires no changes in security policies or ACLs.

## Simplify administration and deployment, increase ease of use

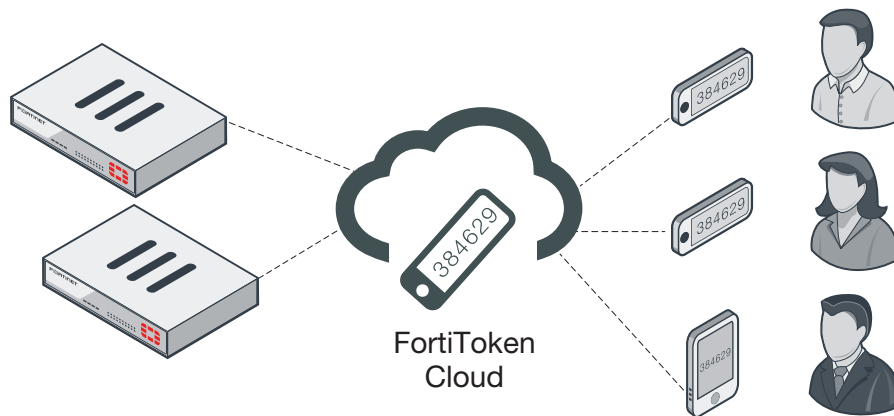

An intuitive web interface and FortiToken Mobile Tokens included, FortiToken Cloud Service reduces licensing and deployment complexity.

## Quickly react to increased demand

With daily usage reports and email notifications of low balance, you are always aware of the health of your deployment. Stackable subscriptions make expanding your deployment easy.

## HIGHLIGHTS

### Simple to Deploy and Manage

As the second factor, FortiToken Cloud works with the FortiGate and does not interfere with the initial user name and password login process. There is no additional hardware or software required. It is easily configured in the FortiGate and does not require you to add or change existing security policies.

From the intuitive dashboard you are able to quickly assess the number of active users, your overall usage, and the number of points remaining. The system will alert you if your point balance reaches a low threshold to prevent any interruption of service. Logs capture key information about both active and previous sessions.

### Scalable

Administrators are able to manage multi-factor deployments from anywhere there is an internet connection. As a Fortinet hosted service, FortiToken Cloud combines the high availability and performance necessary for the most demanding enterprises. The FortiToken Cloud interface supports the segmentation necessary for Managed Service Providers to create two-factor authentication

offerings for their customers. Users and FortiGate appliances can be spread across the world or in the same data center and be part of the same managed group.

### FortiToken Mobile

The mobile application has revolutionized two-factor authentication. Now with almost any mobile device (iPhone, Android, Windows Mobile and Windows Universal Platform) your end users can download and utilize FortiToken Mobile. Offering superior ease of use and without additional hardware other than their mobile device, users now can utilize two-factor with just the swipe or click of a finger to accept the secure token.

### Pricing

FortiToken Cloud is a Subscription Service available through the purchase of points. One point equates to one FortiToken Cloud user for one month. Sold in increments of 120 points, FortiToken Cloud can easily expand as your needs change.

### FortiToken Cloud Features

- Highly Available Secure Managed Service
  - Hosted in Fortinet Data Center
  - 24/7 monitoring
- Two-Factor Authentication service specifically for FortiGate
  - Protect local and remote FortiGate admin, firewall and VPN users
  - Integration with FortiGate out of the box
  - No additional hardware or software to purchase, install and maintain
  - Add users directly from FortiGate
- FortiToken Mobile Push
  - Login details pushed to phone for one-tap approval
  - View login details and approve or deny with one tap
  - Available on iPhone and Android platforms
  - Simple app install and activation
- FortiToken Mobile Token codes
  - One-time token codes generated by mobile application
  - Support for iPhone, Android, Windows Universal Platform, Windows platforms
  - Operates without cell service or WiFi connection

## ORDER INFORMATION

Product	SKU	Description
FortiToken Cloud	FTC-LIC-120	Purchase 120 FTC points where one point equates to one FortiToken Cloud user-month. Points must be activated within one year of purchase. Unused points expire one year after date of activation.
	FTC-LIC-1200	Purchase 1200 FTC points where one point equates to one FortiToken Cloud user-month. Points must be activated within one year of purchase. Unused points expire one year after date of activation.
	FTC-LIC-12K	Purchase 12,000 FTC points where one point equates to one FortiToken Cloud user-month. Points must be activated within one year of purchase. Unused points expire one year after date of activation.
	FTC-LIC-120K	Purchase 120,000 FTC points where one point equates to one FortiToken Cloud user-month. Points must be activated within one year of purchase. Unused points expire one year after date of activation.
