Multifactor Authentication Made Easy

With cloud management and user-friendly FortiToken Mobile Tokens included, FortiToken Cloud includes everything you need to implement multifactor in your FortiGate (or FortiAuthenticator) environment. FortiToken Cloud also supports third party solutions and web applications offered via its APIs.

Many of today's most damaging security breaches have been due to compromised user accounts and passwords. Businesses of all sizes are looking to move beyond passwords alone to authenticate users. Adding additional factors to the authentication process, whether with traditional hardware, or increasingly through mobile device application, has become the new normal. In the past, implementing and managing multifactor deployments could be complex. FortiToken Cloud offers a secure, effective way to manage multifactor authentication (MFA) for our FortiGate through an easy to understand, intuitive interface that can be accessed from anywhere. Best of all, our FortiToken Cloud service includes tokens for our FortiToken Mobile App with PUSH technology, simplifying the end user multifactor experience to a swipe or click to accept.

Centrally manage MFA for FortiGate
Administrators or Managed Service Providers can administer MFA for one or many FortiGate security appliances from a web interface.

Simplify administration and deployment, increase ease of use
An intuitive web interface and FortiToken Mobile Tokens included, FortiToken Cloud Service reduces licensing and deployment complexity.

No additional hardware or software required
Designed for FortiGate, FortiToken Cloud Service requires no changes in security policies or ACLs.

Ease of provisioning for increased demand
With daily usage reports and email notifications of low balance, you are always aware of the health of your deployment. Stackable subscriptions make expanding your deployment easy.
**HIGHLIGHTS**

**Simple to Deploy and Manage**
As the second factor, FortiToken Cloud works with the FortiGate and does not interfere with the initial user name and password login process. There is no additional hardware or software required. It is easily configured in the FortiGate and does not require you to add or change existing security policies. For non-Fortinet environment, any authenticated web application can use FortiToken Cloud MFA service by calling its APIs.

From the intuitive dashboard you are able to quickly assess the number of active users, your SMS balance, and the number of days until expiration. The system will alert you if your account is near expiration to prevent any interruption of service.

**Scalable**
Administrators are able to manage multifactor deployments from anywhere there is an internet connection. As a Fortinet hosted service, FortiToken Cloud combines the high availability and performance necessary for the most demanding enterprises.

The FortiToken Cloud interface supports the segmentation necessary for Managed Service Providers to create MFA offerings for their customers. Users and FortiGate appliances can be spread across the world or in the same data center and be part of the same managed group.

**FortiToken Mobile**
The mobile application has revolutionized multi-factor authentication. Now with almost any mobile device (iPhone, Android, Windows Mobile, and Windows Universal Platform) your end users can download and utilize FortiToken Mobile. Offering superior ease of use and without additional hardware other than their mobile device, users now can utilize multi-factor with just the swipe or click of a finger to accept the secure token.

**Pricing**
FortiToken Cloud is a subscription service available through the purchase of time-based licenses. Licenses are consumed based on the number of MFA cloud service users per year. It includes 125 SMS credits per user with an option to purchase additional SMS credits. All licenses are stackable with co-termed renewals. FortiToken Cloud can easily expand as your needs change.
FEATURES

FortiToken Cloud Features

Highly Available Secure Managed Service
- Hosted in Fortinet Data Center
- 24/7 monitoring
- Realm support to effectively allocate resources and better manage end users
- Support for multiple MFA options: FortiToken Mobile, email, SMS, and FortiToken (hardware token)

MFA Service Integrated with FortiGate and Other Products
- Protect local and remote FortiGate admin, firewall, and VPN users
- Open API to use with any web-based application
- Integration with FortiGate, FortiAuthenticator, FortiSandbox, and FortiADC out of the box
- No additional hardware or software to purchase, install, and maintain
- Add users directly from FortiGate
- Remote FortiGate user support

FortiToken Mobile Push
- Login details pushed to phone for one-tap approval
- View login details and approve or deny with one tap
- Available on iPhone and Android platforms
- Simple app install and activation

FortiToken Mobile Token Codes
- One-time token codes generated by mobile application
- Support for iPhone, Android, Windows Universal Platform, and Windows platforms
- Operate without cell service or WiFi connection
- Secure cross-platform token transfer for iOS and Android devices
