FortiVoice™ Cloud Unified Communications

One Platform for Communication Efficiency

FortiVoice Cloud is a secure cloud-based unified communications (UC) solution that is fast to deploy and easy to activate, whether users are in the office, at home, or on the move. With simple FortiVoice Cloud web-based management, plug-and-play-ready FortiFone IP phones, and intuitive softclients for smartphones and computers, users can start communicating with their teams and customers within minutes. FortiVoice Cloud delivers reliable services and quality communications that empower business of all sizes to connect their users through a single, secure communications platform.

Highlights

- Connects everyone with one integrated solution
- Offers simple phone system management from an intuitive web portal, from anywhere
- Offers unlimited U.S. and Canada calling* from a secure cloud communications solution
- Allows calling from a preferred device using the same business phone number
- Provides real-time collaboration with chat and conferencing
- Ensures protection with the broad, comprehensive Fortinet security ecosystem
Highlights

**All-Inclusive, Affordable Communications**
FortiVoice Cloud has everything users need to get work done, with simple subscriptions and only paying for needed call paths. It includes integrated calling, conferencing, and chat to boost employee productivity, without the premium price.

**Enterprise-grade Quality of Service**
FortiVoice Cloud services and data centers are protected and monitored by the broad Fortinet security ecosystem to deliver the highest uptime standard possible.

**Simplified Management**
The FortiVoice Cloud intuitive web console allows IT to simplify configuration across offices, devices, and users. Cloud-ready plug-and-play FortiFone devices and the mobile-ready softclient make it easy to set up and activate quickly.

**End-to-end Secure Protection**
As a recognized security leader by Gartner and many other industry analysts, Fortinet is the only vendor with integrated, end-to-end security protection from network infrastructure to phone communications.
