

Fortinet VM On-Demand Program

The Fortinet VM On-Demand Program is designed to enable Service Providers to deliver award-winning Fortinet firewall and other protection in an on-demand, pay-as-you-grow model that is better aligned with the agility and elasticity in modern Cloud and managed service offerings. Members of Fortinet’s MSSP Partner Program, as well as other qualified Service Providers globally, can deploy scalable virtualized firewalling and advanced security services on an as-need, per-tenant basis with actual costs automatically and transparently measured based on actual usage.

Highlights

- Turnkey, out-of-the-box platform for pay-as-you-grow firewall consumption
- Seamless on-demand VM licensing, provisioning, metering, and billing
- Unlimited firewall capacity available as needed for elastic clouds and workloads
- Infrastructure costs aligned with tenant/customer service revenues on a monthly or per-period basis
- Avoidance of excess capitalization costs from over-provisioning capacity

HIGHLIGHTS

Components

The Fortinet VM On-Demand Program encompasses three existing, proven Fortinet technologies to enable Service Providers to deliver advanced security services to their customers/tenants.

Component	Description
FortiOS Virtual Appliance	FortiOS provides industry-leading protection, superior visibility and control, and extensive networking capabilities. With FortiOS, you can set consolidated policies that include granular security controls. Every security service is managed through a similar paradigm of control and can be easily plugged into a consolidated policy.
FortiManager	FortiManager lets you maintain control over your FortiGate and FortiAP topologies through an easy-to-use, centralized, single-pane-of-glass management console. Easily control the deployment of security policies, FortiGuard content security updates, firmware revisions, and individual configurations for thousands of FortiOS-enabled devices.
FortiGuard/FortiCare	FortiCare is a centralized hub to search, update and generate reports on registered solutions such as location and entitlement. Metering Group assignment and reports are all done from this one centralized location. FortiGuard Labs provides the industry-leading security services and threat intelligence delivered through Fortinet solutions. FortiOS manages the broad range of FortiGuard services available, including application control, intrusion prevention, web filtering, antivirus, advanced threat protection and SSL inspection

Metering

Fortinet devised and implemented a simple point system for traversing multiple currency zones enabling a unified method of metering wherever tenants/data centers are deployed. Points are consumed by authorized FortiOS virtual appliances securing traffic volumes to and from tenant's secured assets/workloads. Three service options are pre-packaged to allow for attachment to authorized FortiOS virtual appliance; each with their own preset metering value and security profiles.

Service Option	Description
Firewall Only	Enables all features of FortiOS virtual appliance except Security Profiles for advanced L4-L7 services such as IPS and Application Control. 24x7 support included.
Firewall + Web Filtering	Enables all features supported in "Firewall Only" option plus Web Filtering. Includes 24x7 support.
Full UTM	Enables all features of FortiOS virtual appliance including all L4-L7 services. Includes 24x7 support.

Service levels may be changed at any point by the administrator via the Web UI, CLI or through existing FortiManager APIs.

SPECIFICATIONS

Component	Firmware Requirement
FortiOS Virtual Appliance	v5.4.1 and later
FortiManager or FortiManager-VM	v5.4 and later

ORDER INFORMATION

Program	SKU	Description
Fortinet VM On-Demand Program Subscription	FC-10-SPVOL-402-02-12	Annual Fortinet VM On-Demand program fee for deployment and metering of Fortinet Virtual Appliance (VM) solutions. Metering metric based on traffic volume processed.

Point Packs	SKU	Description
Fortinet VM On-Demand Program Point Package	SP-VM5K	Adds 5,000 points to the Fortinet VM On-Demand program account for metering of Fortinet Virtual Appliance (VM) solutions.
	SP-VM10K	Adds 10,000 points to the Fortinet VM On-Demand program account for metering of Fortinet Virtual Appliance (VM) solutions.
	SP-VM25K	Adds 25,000 points to the Fortinet VM On-Demand program account for metering of Fortinet Virtual Appliance (VM) solutions.
