Introducing
FortiGate® 2600F Series

The FortiGate 2600F series NGFW delivers high speed networking, increased scalability, and optimized performance features. Enterprises and service providers using the FortiGate NGFW can manage all of their security risks with the industry's best-of-breed IPS, SSL inspection, and threat protection. The FortiGate 2600F series can be deployed at the enterprise edge, the hybrid and hyperscale data center core, and across internal segments. The multiple high-speed interfaces, high port density, superior security efficacy, and high throughput of this series keeps your network connected and secure.

Security
- Prevents volumetric attacks with HW accelerated DDoS and identifies thousands of applications inside network traffic for deep inspection and granular policy enforcement
- Protects against malware, exploits, and malicious websites in both encrypted and non-encrypted traffic environments
- Prevents and detects against known and unknown attacks using continuous threat intelligence supplied by AI powered FortiGuard Labs security services

Performance
- Provides security for very high throughput flows known as Elephant flows
- Delivers the industry's best threat protection performance and ultra-low latency using purpose-built security processor (SPU) technology
- Provides industry-leading performance and protection for SSL encrypted traffic

Certification
- Independently tested and validated for industry-best security effectiveness and performance
- Received unparalleled third-party certifications from NSS Labs

Networking
- Enables scalable segmentation powered by HW accelerated VXLAN technologies
- Delivers advanced networking capabilities that seamlessly integrate with advanced layer 7 security and virtual domains (VDOMs) to offer extensive deployment flexibility, multi-tenancy and effective utilization of resources
- Delivers high-density, flexible combinations of various high-speed interfaces to enable the best TCO for customers at data centers and WAN deployments

Management
- Includes a management console that is effective, simple to use, and provides comprehensive network automation & visibility.
- Provides Zero Touch Integration with the Security Fabric's Single Pane of Glass Management
- Predefined compliance checklist analyzes the deployment and highlights best practices to improve overall security posture

Security Fabric
- Enables Fortinet and Fabric-ready partners’ products to provide broader visibility, integrated end-to-end detection, threat intelligence sharing and automated remediation

* Target performance, subject to final values.

### Power Supply
Dual Hot-Swappable AC input

### Interfaces
**FG-2600/2601F**: 4x 100GE QSFP28 slots, 16x 25GE SFP28 / 10GE SFP+ slots, 16x 10GE RJ45 ports, 2x 10GE SFP+ HA slots, 2x GE RJ45 MGMT ports

### Deployment Modes
Next Generation Firewall  
Segmentation  
IPS  
Mobile Security

### Highlights
- Delivers the industry’s first compact hyperscale firewall that provides HW accelerated VXLAN and DDoS protection
- Provides security for very high throughput sessions known as Elephant flows
- Delivers the industry’s highest speed NGFW with unprecedented Threat Protection and SSL inspection performance in a compact 2U appliance.
- New hardware architecture with management and dataplane separation, which features a dedicated CPU and purpose-built SPUs designed to manage functionality and process traffic.
- Provides superior flexibility and reduction in port and cable costs with uplink speeds in typical datacenter designs of 25 Gbps and 100 Gbps.
- Management interface redundancy and hot swappable/redundant power supplies.
