Introducing FortiGate® 3700F Series

The FortiGate 3700F series NGFW delivers high speed networking, increased scalability, and optimized performance features. Enterprises and service providers using the FortiGate NGFW can manage all of their security risks with the industry’s best-of-breed IPS, SSL inspection, and threat protection. The FortiGate 3700F series can be deployed at the enterprise edge, the hybrid and hyperscale data center core, and across internal segments. The multiple high-speed interfaces, high port density, superior security efficacy, and high throughput of this series keeps your network connected and secure.

**Security**
- Identifies thousands of applications inside network traffic for deep inspection and granular policy enforcement
- Protects against malware, exploits, and malicious websites in both encrypted and non-encrypted traffic
- Prevent and detect against known and unknown attacks using continuous threat intelligence from AI-powered FortiGuard Labs security services

**Performance**
- Delivers industry’s best threat protection performance and ultra-low latency using purpose-built security processor (SPU) technology
- Provides industry-leading performance and protection for SSL encrypted traffic

**Certification**
- Independently tested and validated for best-in-class security effectiveness and performance

**Networking**
- Delivers advanced networking capabilities that seamlessly integrate with advanced layer 7 security and virtual domains (VDOMs) to offer extensive deployment flexibility, multi-tenancy and effective utilization of resources
- Delivers high-density, flexible combination of various high-speed interfaces to enable best TCO for customers for data center and WAN deployments

**Management**
- Includes a management console that is effective, simple to use, and provides comprehensive network automation and visibility
- Provides Zero Touch Integration with Fortinet’s Security Fabric’s Single Pane of Glass Management
- Predefined compliance checklist analyzes the deployment and highlights best practices to improve overall security posture

**Security Fabric**
- Enables Fortinet and Fabric-ready partners’ products to provide broader visibility, integrated end-to-end detection, threat intelligence sharing, and automated remediation
SPECIFICATIONS

**FG-3700F**

600 Gbps
Firewall Throughput

750,000
New Sessions/Sec.

130 Million
Concurrent Sessions

**FG-3701F**

165 Gbps
75 Gbps
70 Gbps

VPN
NGFW
Threat Protection

* Target performance, subject to final values.
** Requires Hyperscale Firewall License for hardware session setup acceleration and logging

---

**Deployment Modes**

Next Generation Firewall
Segmentation
IPS
Mobile Security

---

**Power Supply**

Dual Hot-Swappable AC inputs

---

**Interfaces**

- 4× 400GE QSFP-DD Slots
- 4× 25GE SFP28 ULL Slots
- 18× 50GE SFP56 Slots
- 2× 50GE SFP56 HA Slots
- 2× 10GE/GE RJ45 Mgmt Ports

---

**Highlights**

- Delivers the industry's first compact hyperscale firewall that provides HW accelerated VXLAN and DDoS protection
- Provides security for very high throughput sessions known as Elephant flows
- Delivers the industry's highest speed NGFW with unprecedented Threat Protection and SSL inspection performance in a compact 2U appliance
- With dedicated 25GE SFP28 Ultra Low Latency (ULL) ports provide <2us latency for time-sensitive applications, such as high frequency trading.
- Provides superior flexibility and reduction in port and cable costs with uplink speeds in typical datacenter designs of 400 Gbps and 50 Gbps
- High speed 10GE redundant management interfaces and 50GE redundant HA interfaces with hot swappable/ redundant power supplies creating an ultra reliable and redundant system for datacenter deployments
