# Fortinet Managed IPS Rules for AWS Network Firewall

Filter malicious traffic at the perimeter of your VPC with Fortinet Managed IPS rules powered by FortiGuard Labs

AWS Network Firewall

VPC

Fortinet Managed IPS Rules for AWS Network Firewall

Deploy automatically updated IPS rule sets for AWS Network Firewalls to protect your VPCs. FortiGuard Labs offers rule sets tuned for common deployment scenarios.

Powered by
FortiGuard Labs
Global Threat Research and Response

Leverage the power of AWS Network Firewall with Fortinet Managed IPS Rules for AWS Network Firewall based on the latest threat information from FortiGuard Labs. FortiGuard Labs is one of the industry's largest threat intelligence and research organizations. Its global team of threat hunters, researchers, analysts, engineers, and data scientists use advanced artificial intelligence tools to ingest over 200 different information feeds and over 100 billion security events every day to generate the actionable intelligence you need to face an ever-evolving threat landscape.

Highlights

- Add-on for AWS Network Firewall
- Based on threat intelligence from FortiGuard Labs
- Updated automatically

Highlights

Fortinet Managed IPS Rules for AWS Network Firewall provides multiple rule set options to address common use cases, such as:

Client Vulnerabilities

Ruleset for detecting attempts to exploit vulnerabilities in common client applications, including desktop software.

Malware Detection

Ruleset for detecting communication attempts from malware backdoors, worms, and remote access trojans (RATs), including command and control traffic.

Server and Operating System Vulnerabilities

Ruleset for detecting vulnerabilities targeting operating systems and common server applications, including DNS, email, and remote access.

Web Client Vulnerabilities

Ruleset for detecting exploits targeting vulnerabilities in web browsers, including Chrome, Firefox, Internet Explorer, and Edge.

Web Application Vulnerabilities

Ruleset for detecting exploits targeting vulnerabilities in common web applications, including popular content management system platforms such as WordPress and Joomla.

Web Server Vulnerabilities

Ruleset for detecting exploits targeting web server vulnerabilities, including web servers, such as Apache, and proxy web servers, such as Squid.

Powered by FortiGuard™ Labs
Global Threat Research and Reponse

Fortinet's award-winning FortiGuard Labs is the backbone for the Fortinet rule group signatures. As long as you are an active rule group subscriber, you automatically have the latest protections and updates without having to do anything further.

Order Information

For a limited time, customers can use Fortinet Managed IPS Rules for AWS Network Firewall at no additional cost. See https://www.fortinet.com/offers/ips-rules-trial for details.
