## Product Offerings

FortiRecon is a digital risk protection (DRP) service that allows customers to gain visibility of their digital attack surface, receive targeted threat intelligence, and reduce organizational risk. The solution consists of three main components:

- **External Attack Surface Management (EASM):** provides an adversary’s view of the organization digital attack surface and prioritizes risks and exposures, enabling customers to mitigate threats in a controlled manner before they become a problem.
- **Brand Protection (BP):** continually monitors the organization’s public-facing brand, to detect web-based phishing attacks, typosquatting, rogue applications, credential leaks, and brand impersonation in social media, which may impact brand value, integrity, and trust.
- **Adversary Centric Intelligence (ACI):** leverages FortiGuard Threat Analysis to provide comprehensive coverage of dark web, open source, and technical threat intelligence, including threat actor insights to enable organizations to respond proactively assess risks, respond faster to incidents, better understand their attackers, and guard assets.

The following shows a summary of FortiRecon product offerings. For details, see the [FortiRecon datasheet](#).

## FREQUENTLY ASKED QUESTIONS

### **What defines an asset?**

An asset is any monitored resource, such as an ASN, IP address, domains, subdomains, or certificates.

### **How can my customer find out the number of assets they have?**

Work with the Fortinet sales specialist to help scope the number of assets.

### **Are SKUs stackable?**

No. SKUs are up to an asset count and must be cotermed to jump to the next asset count.

### **How do I increase the service level after the initial order?**

You can achieve this via a co-term.

### **How do I extend a contract's time period?**

You can add a contract license to an existing subscription.
