# FortiSASE

## Product Offerings

### Secure Private Application Access
- Secure Private Access (SD-WAN + NGFW)
- Zero Trust Network Access (ZTNA)

### Secure Internet Access
- SSL Inspection
- Inline Antivirus and Antimalware
- Intrusion Prevention (IPS)
- FortiGuard Web Filtering
- Botnet C&C

### DNS Security
- Data Leak Prevention

### Endpoint Security
- Sandbox and Sandbox Cloud
- Vulnerability Management
- LAN
- LAN
- LAN

### Access Details
- WAN Access Type
- Bandwidth Included
- Managed Endpoints
- Additional Services
- 24x7 Support
- SASE Cloud Managed
- SASE Cloud Logging
- FortiCASB User-based SaaS Security

1. Available for agent-based usage only.
2. Bandwidth pooled for all users and devices in the account, supporting burst traffic and proxy chaining deployments.
3. Cloud management includes security and networking between locations, but does not include management of FortiGates at the branch or data center.

1. Available for agent-based usage only.
2. Bandwidth pooled for all users and devices in the account, supporting burst traffic and proxy chaining deployments.
3. Cloud management includes security and networking between locations, but does not include management of FortiGates at the branch or data center.
FREQUENTLY ASKED QUESTIONS

How is the solution licensed?
Different customers can consume FortiSASE in different ways. They can mix and match different options. Overall, there are the following options:
- **User-based**: this allows users to connect with multiple devices concurrently (agentless or agent-based).
- **Endpoint-based**: simplest option allows customers to purchase FortiClient-based SASE subscription for corporate devices. This license enables SASE access, with Endpoint Protection Platform (EPP), VPN, and ZTNA components available on each device.
- **Thin Edge**: enables customers to connect branch offices to FortiSASE with an optional bandwidth add-on subscription.

When is each type available?
- **User-based**: available today.
- **Endpoint-based**: available today.
- **Thin Edge**: available today for 200F (beta).

I already purchased the FortiClient ZTNA/VPN or EPP/APT options. Can I upgrade them to SASE?
Yes. Refer to the upgrade matrix in the FortiClient Ordering Guide for details.

Can my customer send logs to their SIEM?
Yes, this is available and covered under the total bandwidth allotment per account.

What features are new in Q3 of 2022?
A FortiCASB license is included with the purchase of any FortiSASE user subscription as of Q3 2022. A FortiCASB SaaS Guardian SKU is included with FortiSASE purchase as follows:
- **FC1-10-FCASB-145-02-DD**: FortiCASB 100 User SaaS-only License
- **FC2-10-FCASB-145-02-DD**: FortiCASB 500 User SaaS-only License
