

Simple and Effective Cybersecurity with the FortiGate SMB Bundle

Enterprise-grade Protection and Performance Without the Complexity and Cost

SMBs like you need technology to work together with little to no effort. You also need simple and effective security that you can trust. And you want to manage it all from the cloud with a single pane of glass.

The FortiGate SMB bundle is your ideal solution. It's affordable and integrates our industry-leading Fortinet security hardware and services. The FortiGate SMB bundle is available for FortiGate 40F, 60F, 70F, and 80F series.

FortiGate NGFWs: The Most Deployed and Trusted Network Firewalls in the World

FortiGate is a purpose-built NGFW to deliver unparalleled protection and performance to safeguard your mission-critical networks without increasing complexity and expense. As a cornerstone of the Fortinet Security Fabric, FortiGate provides out-of-the-box integration and easy automation across Fortinet products. You can simplify deployment, monitoring, and management of all Fortinet products connected to your LAN and WLAN from a single platform to ensure the safety of your business and employees.

FortiGuard Services: AI-powered Protection Stops Ever-evolving Cyberthreat

The FortiGuard SMB Protection Services gives you peace of mind by providing comprehensive protection for applications, content, web, devices, and users. It intelligently assesses risks and counters known and unknown threats to ensure rapid, real-time detection and response—regardless of where they occur— via a context-aware, consistent security policy for users and applications.

FortiGate Cloud: Simplified Management and Analytics

FortiGate Cloud, included in FortiGuard SMB Protection Services, simplifies network operations for physical FortiGates and connected devices such as the FortiSwitch, FortiAP, and FortiExtender, as well as virtual FortiGate-VMs. With enterprise-grade visibility and analytics included, FortiGate Cloud easily becomes the one-stop shop for SMB IT teams and managed service providers (MSPs) handling multiple customer deployments.

FortiCare Premium: 24×7×365 Customer Services and Support

No solution is complete without experienced support and assistance. FortiCare Premium is targeted toward devices that require 24×7×365 with one-hour response for critical issues and next-business-day responses for non-critical issues.

44% of small businesses confirmed they had at least one security incident in 2021. And for many businesses with fewer than 25 employees, the worst incident took at least days to fix.¹
