Security Driven Networking Consulting Services

Service Overview
To stay ahead of a rapidly evolving threat landscape, organizations must adopt security architecture and operations that enable a comprehensive and measured approach to cybersecurity. Fortinet offers Security Driven Networking & Consulting Services to partner with business leaders, helping organizations be at their best through this ever-changing environment.

Fortinet experts discover existing security posture elements through a vendor-agnostic approach, align findings to business goals, strategic objectives, and compliance requirements, and guide existing projects and future planning toward framework maturity. These collective tasks and outcomes empower organizations to achieve a holistic security architecture resilient enough to withstand continuous change in the threat landscape.

Advisory Team Proficiency
✓ Dedicated access to experienced professionals who possess decades of industry security experience and direct connection to additional experts inside Fortinet
✓ Our team can provide customers with Network Security advisory service during the entire lifecycle of their projects
✓ Best-in-class methodologies and framework alignment with studied application from our existing customer base

Domains
- Next Generation Firewall
- IPS
- Secure SD-WAN
- Dynamic Routing
- High Availability
- Segmentation

Key Business Outcomes
  - End to end consistent security posture across security devices
  - Architectures designed be resilient and to meet business goals
- Minimize Attack Surface: Review of existing network security to ensure the exposed attack surface is as minimal as possible.
  - Security strategy and security policy review
  - CIS & DIST assessments
  - Security Fabric integration at all levels possible
  - Integrated & actionable threat intelligence

Simple and Flexible Engagement
Per-day remote service (FP-10-SA001)
- Discover existing network security posture baseline across the entire enterprise
- Align existing systems and processes to desired security framework(s) and business goals
- Guide templated or customized reference security architectures and processes

Deliverables:
- Network Security High Level Design (HLD) report
- Best practices recommendations
- Security policy review
- NIST CSF maturity score
- Network Security reference architecture

Discover
- Conduct interviews
- Review policy, data reports, metrics, security assessments
- Assess security across LOB and locations

Guide
- Security Architecture
- Best Practices
- Maturity Roadmap
- Easy handoff for implementation
- Identify critical business assets
- Ongoing assessment on security posture

Align
- HLD report delivered
- NIST CSF score readout
- Reference architectures

Why Fortinet?
Fortinet is the #1 global cybersecurity company, with more than 20 years of experience in protecting assets, detecting malicious actors, mitigating threats, and leading the way on industry evolution.

Fortinet delivers the Security Fabric, a broad, integrated, and automated cybersecurity framework that weaves together all facets of operational and functional security.

FortiGuard Labs Global Threat Research and Response organization leverages tested artificial intelligence and machine learning technologies to remain on the cutting edge of threat intelligence.
