

Security Consulting Services

The threat landscape continues to change.
Is your security posture resilient enough to protect your critical assets?

Service Overview

To stay ahead of a rapidly evolving threat landscape, organizations must adopt security architecture and operations that enable a comprehensive and measured approach to cybersecurity. Fortinet offers **Cybersecurity Advisory & Consulting Services** to partner with business leaders, helping organizations be at their best through this ever-changing environment.

Fortinet experts **discover** existing security posture elements through a vendor-agnostic approach, **align** findings to business goals, strategic objectives, and compliance requirements, and **guide** existing projects and future planning toward framework maturity. These collective tasks and outcomes empower organizations to achieve a holistic security architecture resilient enough to withstand continuous change in the threat landscape.

Advisory Team Proficiency

- Dedicated access to experienced professionals across multiple disciplines who possess decades of industry experience and direct connection to additional experts inside Fortinet
- Our team covers the entire spectrum of the security landscape, something not available or practical to most service providers of any scale
- Best-in-class methodologies and framework alignment with studied application from our existing customer base

Domains

- Multi-cloud
- Infrastructure & Edge
- Zero-Trust Network Access
- Endpoint Security - EDR
- Identity Management
- Security Operations

Key Business Outcomes

- **Cybersecurity Alignment:** Successful cybersecurity programs establish initiatives that align strategically and operationally with business goals. Our team explores and rates your existing security posture against the NIST cybersecurity framework (CSF) to make prioritized recommendations for efforts and investments to align security objectives.
- **End-to-end Security Architecture:** Security is only as strong as your weakest link. Fortinet applies its decades of leading innovation to design architectures that identify vulnerabilities, introduce compensating controls, and mitigate threats.
- **Growth-minded:** Organizations are changing organisms, and as such, require resiliency that secures critical business assets, transactions, and ROI today that won't require bulk upgrades, redesign, or costly replacements tomorrow.

Simple and Flexible Engagement

Per-day remote service (FP-10-SA001)

- **Discover** existing security posture baseline across the entire enterprise
- **Align** existing systems and processes to desired security framework(s)
- **Guide** templated or customized reference security architectures and processes

Deliverables:

- Security Architecture Review (SAR) report
- NIST CSF maturity score
- Reference and/or customized architecture

Why Fortinet?

Fortinet is the #1 global cybersecurity company, with more than 20 years of experience in protecting assets, detecting malicious actors, mitigating threats, and leading the way on industry evolution.

Fortinet delivers the Security Fabric, a broad, integrated, and automated cybersecurity framework that weaves together all facets of operational and functional security.

FortiGuard Labs Global Threat Research and Response organization leverages tested artificial intelligence and machine learning technologies to remain on the cutting edge of threat intelligence.

- SAR report delivered
- NIST CSF score readout
- Reference architectures
