Protect Web Apps and APIs on AWS with FortiWeb Cloud WAF-as-a-Service

Better security, less time and money

Legacy Web Application Firewalls (WAF) can’t keep up with a fast-changing world.

FortiWeb Cloud WAF-as-a-Service for AWS cuts costs and frees up time while improving protection.

The sad state of application security

43% of WAF deployments ran out of memory in the last year (Fortinet research, 2019-2020). 50% of WAFs experience false positives over 75%

Better security, less time and money

FortiWeb Cloud makes business sense

50% of SOCs experience analyst churn of 10% to 25% annually, resulting in chronic staffing shortages and continual retraining efforts.

Liberate the time and talent of your team

Are you overspending on your WAF?

Annual average legacy WAF spend

for WAF products

on WAF management

3 ways FortiWeb Cloud WAF-as-a-Service for AWS reduces your costs

Agility and resilience

Highly resilient cloud-based architecture

Fault tolerance

Load balancing

Performance

Capacity planning

Manual tuning and configuration

Compute, network, and storage infrastructure for on-premises WAF

Intelligent threat detection that drastically reduces false positives

Optimized costs

Pay for what you need, when you need it, from test instances to terabytes

Modern security

Protect against OWASP Top 10, malicious bots, and zero-day threats

“...We’ve found that Fortinet WAF is a reliable and stable solution. The product is easy to manage, with a friendly GUI interface. Unlike other products, it uses machine learning, so it can identify users’ normal behavior...”

– Knowledge Specialist, Manufacturing Industry

There’s a better way.

The hours your team spends on:

45 hours per week processing WAF alerts

45 hours per week writing new rules

Explicitly shows the need to compensate with a better, more flexible approach.

Dramatically reduces manual configuration and management.

Provides Cloud, SSL, and API protection, built in simple, all in one package.

We’ve found that Fortinet WAF is a reliable and stable solution. The product is easy to manage, with a friendly GUI interface. Unlike other products, it uses machine learning, so it can identify users’ normal behavior.
