Surveys show 94% of SMBs use cloud services.

Surveys show 50% of SMBs expect cloud use to accelerate because of Covid-19 related remote work demands.

Surveys show 70% of all SMB workloads and data will reside in a public cloud within 12 months.

ARE YOUR BUSINESS OPERATIONS SAFE IN THE CLOUD?

Half of all SMB business data breaches result from inappropriate IT resource use by employees.

The most costly attacks on SMBs are incidents affecting IT infrastructure hosted by third parties such as AWS, Azure, and Google Cloud.

More than half of businesses silo applications in different clouds.

Fewer than 1/3 of businesses use multi-cloud management tools.

Top 2 SMB cloud challenges: Security and Lack of resources/expertise.

Security 76% of respondents

Lack of resources/expertise 75% of respondents
