

Consulting Systems Engineer(CSE) - Tokyo

Responsibility:

- Support Japan sales activities as a strategic and high-level corporate technical resource for vital pre-sales engagements and key opportunities
- Act as subject-matter expert in pre-sales design reviews and serve as authoritative consultant to Field Systems Engineers by providing technical guidance and leadership
- Participate with SE peers to lead the design and architecture of secure IP networks utilizing and leveraging all aspects of Fortinet's product line to create superior solutions in competitive environments
- Provide training to System Engineers at various events worldwide
- Work closely with Product Management and Engineering to help identify, qualify, and develop features critical to Fortinet's success
- Interface with Fortinet's Business and Technology partners within designated technology discipline and distribute that knowledge to the field Systems Engineers
- Travel worldwide on short notice

- Comply with activity reports and ensure timely communication to the CSE Manager

Requirement:

- 7 years or more of proven experience in designing and implementing advanced security solutions in a consulting and/or pre-sales role
- Solid knowledge and understanding of:
- Hands on experience with BGP, understanding of routing/switching/VPN. CCIE would be a big plus
- Hardware architecture of Firewall including chassis-based products
- Proven hands on experience with FortiGate, FortiManager and FortiAnalyzer (disireable)
- Good knowledge and understanding of Public Cloud environments such as AWS, Microsoft Azure, Google Cloud Platform (desirable)
- Experience with testing devices such as Spirent and Keysight (Ixia) (desirable)
- Ability to travel on short notice
- Team worker, focused on reaching objectives
- Good written English skills. Ideally can communicate with oral English as well
- Bachelors Degree or equivalent experience. Graduate degree preferred
