This License applies to any work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this License. Each work containing a notice placed by the copyright holder saying it may be distributed under this License, and each derivative of such a work, is referred to as a "work based on the Program", regardless of whether it is called a derivative work or not.

The concepts of work covered by this License, and of licensing a work that contains a notice placed by the copyright holder saying it may be distributed under the terms of this License, and of modification of such a work, apply just as well to derivative works as to the original work.

For purposes of this definition, "work" includes computer program code, documentation derived from the program, and the organization of the code and documentation contained in the file in which the program code and documentation are stored. Notice means any attempt to copy, distribute or modify the program.

A "License" means any written agreement or legally enforceable promise by the Licensee to grant the Licensor the right to practice the copyright claims of the Licensor.

This License is intended to make sure that the program code, libraries, and other related material distributed by the Free Software Foundation are free programs that anyone can redistribute and change.

No License Grant 1. This License Agreement applies to any software library or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this Lesser General Public License ("this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executable programs.

The "Library" below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the whole Library or, if features or parts of it are used in combination with or linked with the code of another library to produce a work, such other library.

The term "Licensee" refers to the recipient of newly created works, or to you as the recipient of copied works. The "Licensee" may be a natural or legal person.

You may copy and distribute the Library under the terms of Sections 1 through 9 of this License.

You may use and modify the Library as warned below:

You must copy the entire License, including this permission notice, in modified source versions of the Library. The only other terms that you must satisfy, to use and copy the Library, are to distribute the modified work under this License, and to verify that you added the information according to the above requirements.

You may offer to distribute the Library under different terms, provided that you also offer the entire Original Software License. For example, you may offer to distribute the Library under the terms of any later version of this License, or under the terms of any GNU General Public License or copyleft-style license of your choice that permits the program to be modified and redistributed under these terms along with others written by you and included in the original source code of the Library that you distribute.

You may also offer to distribute the Library at the same time with other licenced software which is covered by permission notices complying with this License.

If you distribute the Library at the same time with other software which is not covered by this License, it falls outside of the scope of this License.

You may distribute in object code or executable form the modified version of the Library under terms of your choice, provided that you also offer a machine-readable copy of the corresponding source code.

The Library and any derivative works thereof may be distributed free of charge.

You must distribute in any modified version of the Library additionally copy of the correspondingly modified version of the Library in executable or object code form.

The Library and any derivative works thereof must be made available under this License, for any other name, unless you are an entity (or an employee of an entity) acting on behalf of an entity, and

2. if the distribution is of a complete library, under terms that comply with this License in all respects.

You must also keep intact all these notices.

This License AND OTHER WORKS COVERED BY THIS LICENSE ARE DISTRIBUTED WITHOUT ANY WARRANTY AND UNLESS EXPRESSLY STATED TO THE CONTRARY HEREIN.

THE PROGRAM IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED UNDER THIS LICENSE BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE PROGRAM OR THE USE OR OTHER DEALINGS IN THE PROGRAM.

Subsection (c) of this Section concerns works containing notices placed by the copyright holder that it is intended, to be used under the conditions of the corresponding application program. In such case, the notice may state that the program may be used under the terms of this License in this application program only, if you have compiled the application program on an unpublishable computer.

"Corresponding application program" means a application program that, unless explicitly specified otherwise, contains source code that调用 canned forms the program library and allows others to make use of the program library, or any other facilities of the program library, provided appropriately licensed.
