This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this License. Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program distributed under this License produces output, and so does compiling it to object code, which is therefore covered by subsection 1(c).

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and if you add your own permission notice, these requirements do not apply to those sections. They do apply in any other case.

This License is intended to make a statement of what is considered a reasonable condition for redistribution of software within a free software system.

1. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this License. Each licensee is addressed as "you".

2. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Library a copy of this License along with the Library.

3. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and distribute such modifications or your copies to anyone, provided that you plainly mark them as modified versions of the Library, and provide a prominent notice saying that you have modified it.

4. You may offer to distribute the Library or any modification of it under the terms of this License, with the addition of a very few条款

5. You may distribute in object code or executable form the Library, such as we provide and which you linked at your option with the work under which this copy of the Library was distributed; and distribute a copy of the above documents from the Library, such as we provide and which you linked at your option with the work under which this copy of the Library was distributed.

6. You may offer to distribute separately the source code from the object code, or the executable from the source code.

7. A program that does not contain derivative works, and whose use or distribution you offer to the public under this License is called a "work with the Library", and such a work with the Library is called a "combined work.

8. The term "Librarian" means an organization or entity to whom the distribution right has been granted under Section 15.

9. The Free Software Foundation may publish revised versions of this License. Each version grants additional permissions to use, distribute and/or modify the Library.

10. Any other distribution or modification of this Library, or any derivative work (in whole or in part), falls under this License, provided you make reasonable efforts to ensure that users of that distribution or modification have access to the version of the License under which you received the Library, or other appropriate legal or commercial means.

11. No warranty is given for the Library, to the extent permitted by law; the library is provided "as is" without warranty of any kind, either expressed or implied, including, but not limited to, the warranties of merchantability and fitness for a particular purpose. The only warranty given with the Library is any warranty given to you by a copyright holder or owner of the Library (See the end of this file for copy of this license).

12. In the event an entity files a claim against a Librarian, and that claim asserts that the Library or a work that used the Library is infringed by that claim, the Licensor hereby grants the Librarian an indemnification against that claim.

13. If you distribute or otherwise use the Library in violation of this License, the Licensor may request that you cease redistribution of the Library or use during the term of the request.

14. If you distribute the Library under these terms, and the recipient thereafter distributes modified versions of the Library, the recipient is obligated to distribute such modifications under these terms, provided that you did not distribute the modified Library under terms of your own license.

15. The warranty disclaimer contained in Sections 11 and 12 of the preceding GPL License is incorporated herein.
