

# FORTINET E-RATE ELIGIBLE SOLUTIONS FOR K-12 EDUCATION

School IT departments face many challenges while keeping students, faculty, and staff happy and safe from cyber threats. You deal with an ever-increasing number of devices connecting to the network; you must comply with regulations like HIPAA and CIPA; you must fend off alarmingly sophisticated threats like ransomware; and you need to meet schools' exploding bandwidth demands with your limited budgets and resources.

One resource to help with these demands is the Federal Communications Commission's **E-rate program**. E-rate is designed to give public schools and libraries cost-effective access to the technology they need to bolster their network infrastructures and prepare for future educational needs.

The E-rate program is a tremendous opportunity for schools and libraries to purchase security and networking technology at zero or reduced cost. Fortinet offers many E-rate eligible solutions and we are happy to help you navigate the process and answer any questions.

Fortinet's proven security and networking solutions secure educational institutions of all sizes around the globe. Our products offer:

- Reduced complexity with end-to-end consolidated network and wireless access security
- Centralized management to save time and resources
- Comprehensive security across threat vectors, including DDoS attack mitigation, content filtering, email security (including data loss prevention), and application control

For more information, please visit [www.fortinet.com/education](http://www.fortinet.com/education) or contact us at [education@fortinet.com](mailto:education@fortinet.com).

Or, take a look at our E-rate eligible products on our E-rate Information Center: <http://www.erateproviderservices.com/fortinet-home>.
