

FortiCare 360 PROACTIVE AND ADVANCED SUPPORT SERVICES

Never before have organizations had to rely so heavily on the optimal performance of their network security devices, and yet equipment failure accounts for 40% of network downtime. FortiCare 360 enables organizations to take a more proactive approach in the identification and prevention of potential risks, along with expert advice and priority support services should the need arise.

FortiCare 360 premium support service with FortiSIEM enables organizations to more rapidly detect and remediate real and potential device performance issues associated with their FortiGate and FortiWiFi security appliances. FortiCare 360 includes all the comprehensive benefits available with FortiCare 24x7 and greatly expands on those services with direct routing to Fortinet Advanced Services Engineers for support needs, enhanced service-level agreements (SLAs¹) for response times, and proactive automated notification of device conditions needing immediate attention. FortiCare 360 customers also receive environmental and performance monitoring with personalized monthly audit reports, along with best practice recommendations to ensure the ongoing optimal performance of these critical devices.

FortiCare 360 PROVIDES

1

FortiGate/FortiWiFi Proactive Monitoring

A FortiCare 360 engineering professional will guide the setup of the FortiCare 360 “Collector” software that will reside on a Virtual Machine that you choose or purchase from Fortinet, to enable collection and monitoring of the relevant performance and environmental data.

2

Proactive Notification, Reporting, and Analysis

Critical events or conditions discovered by the FortiCare 360 Collector will automatically generate email notification to the designated customer representative(s) for further investigation. Notification is also sent to the Advanced Services Engineers should action be required.

3

Personalized Monthly Audits with Premium Support

FortiCare 360 provides 24x7x365 support from Fortinet Advanced Services Engineers to ensure you have the right resource to quickly resolve any conditions associated with your covered devices. These same professionals will provide personalized monthly device audit reports, and offer industry best practice advice for remediation of any critical issues.

KEY FEATURES AND BENEFITS

- 24x7 Priority Support from Highly Skilled Advanced Services Engineers
- Monthly Device Health & Performance Audits
- Proactive Notification of Critical Conditions or Events
- Proactive Monitoring & Prevention of Potential Performance Threats
- “Best Practice” Guidance
- Ongoing Device Monitoring & Optimization
