

Fortinet and Centrify Integrated Security Solution

Security Without Compromise with Unified Identity Services

The rapid adoption and proliferation of mobile devices, apps, and services in enterprises today have many business and productivity benefits. However, the mobility revolution brings new challenges to IT organizations, especially in the security area. There is great diversity of endpoints, applications, and services, and employees typically need to authenticate with a wide variety of systems, with each app or service representing another silo of identity for IT to manage.

Security considerations are paramount, given the loss of valuable data and intellectual property resulting from device theft, unauthorized network access, and the presence of new, evolving and increasingly sophisticated threats in today's globally connected networks. The evolving regulatory climate and growing stakeholder security demands point to the urgent need for centralized, automated identity management and access control.

In today's brave new world of SaaS (Software as a Service) and mobility, an enterprise's users, apps, content, and devices are no longer "behind the firewall." IT organizations have to address these challenges:

- Effectively manage and secure content in the cloud.
- Secure employees' mobile devices.
- Gain visibility to the apps & services used by employees.
- Manage identity and control access across platforms and devices.

Fortinet and Centrify have partnered to deliver an industry-leading security solution to address these challenges. The Centrify Identity Platform uniquely secures and unifies identity for both privileged and end users across today's hybrid IT world of cloud, mobile, and data center. Fortinet's award-winning FortiGate Enterprise Firewall Platform provides the industry's highest-performing firewall capabilities, and Fortinet's FortiGuard Security Subscription Services provide the industry's highest level of threat research, intelligence, and analytics. Bringing the Fortinet and Centrify products together into one integrated solution delivers an identity management solution to enterprise customers with unparalleled security protection.

Key Benefits

- Control access to cloud and mobile apps and manage the devices used to access them.
- Improve security by eliminating easily cracked, recycled, or improperly stored passwords.
- Keep sensitive directory info where you want it: on-site in LDAP or Active Directory, in cloud, or any combination.
- Create comprehensive user access policies that span across apps and devices.
- Enforce deeper security with per-app policies and context-aware multi-factor authentication.
- Get unparalleled security protection with the industry's best validated security protection.
- Leverage Global Threat Intelligence to protect individual customers, using Fortinet's FortiGuard Security Subscription Services.

The Solution

The Centrify Identity Platform uniquely unifies cloud app and mobile management into an enterprise cloud service. Centrify leverages identity to secure and manage users' access to applications from any device, regardless of location. By leveraging a single identity across cloud, mobile, and onsite apps, users get a single username and password across all the apps they use for work, and IT can enforce consistent access policies based on user identity.

The Centrify Identity Platform provides a single, simple cloud portal for app management. Users get one-click access to all their apps from any device, and IT gets policy-based control, as well as automated provisioning and account management - one place to manage all accounts and devices.

FIGURE 1: INTEGRATED IDENTITY MANAGEMENT SOLUTION FOR SAAS AND MOBILITY.

Complementing Centrify's Identity Management capabilities in the solution is Fortinet's award-winning FortiGate Enterprise Firewall Platform, which provides end-to-end security services across the entire network. This is strengthened by Fortinet's FortiGuard Security Subscription Services which provide the industry's highest level of threat research, intelligence, and analytics. The solution leverages Global Threat Intelligence to protect individual customers, by using FortiGuard to enable visibility and control for next-generation protection against advanced threats, including zero-day attacks.

By combining Centrify's portfolio for unified identity management with the best security protection provided by Fortinet, the solution delivers security without compromise with one unified identity infrastructure across data center, cloud, and mobile.

Solution Benefits

- Control access to cloud and mobile apps and manage the devices used to access them.
- Improve security by eliminating easily cracked, recycled, or improperly stored passwords.
- Keep sensitive directory info where you want it: on-site in LDAP or Active Directory, in cloud, or any combination.
- Create comprehensive user access policies that span across apps and devices.
- Enforce deeper security with per-app policies and context-aware multi-factor authentication.
- Manage and control application provisioning and entitlements.
- Get unparalleled security protection with the industry's best validated security protection.
- Leverage Global Threat Intelligence to protect individual customers, by using Fortinet's FortiGuard Security Subscription Services to enable visibility and control for next-generation protection against advanced threats, including zero-day attacks.

Leverage the Fortinet and Centrify integrated solution to enjoy improved business agility and enhanced user productivity, while ensuring the highest levels of security protection and compliance in your organization.

About Centrify

Centrify is the leader in securing enterprise identities against cyberthreats that target today's hybrid IT environment of cloud, mobile, and on-premises. The Centrify Identity Platform protects against the leading point of attack used in data breaches — compromised credentials — by securing an enterprise's internal and external users as well as its privileged accounts. Centrify delivers stronger security, continuous compliance, and enhanced user productivity through single sign-on, multi-factor authentication, mobile and Mac management, privileged access security, and session monitoring. Centrify is trusted by over 5000 customers, including more than half of the Fortune 50. Learn more at www.centrify.com.
