

INTELLIGENT VISUAL CONTENT SCANNING TECHNOLOGY ENSURES EMPLOYEE PROTECTION AND COMPLIANCE FOR ENTERPRISE CUSTOMERS

Not Safe for Work (NSFW) visual content in the workplace damages brand and company reputation, degrades company culture and can give rise to legal liability claims from allowing the creation of a hostile work environment. Enterprises have a duty of care to protect employees, and can be held liable unless proactive technological solutions are deployed.

Fortinet and Image Analyzer technology partnership provides FortiProxy and FortiMail customers with an intelligent visual content scanning solution that helps address the issue of NSFW content in the workplace.

JOINT SOLUTION DESCRIPTION

FORTIMAIL

The FortiMail Image Analysis module protects the network against NSFW images that are shared via email. The module can accurately identify high-risk image attachments within emails, and alert users to prohibit communication per their company email policy. With the module, organisations gain visibility into user activities that might be in breach of company policies, and can impose appropriate actions by leveraging FortiMail's flexible policy rules.

FORTIPROXY

The FortiProxy Image Analyzer powered Content Analysis Service module protects employees from NSFW visual web-based content and helps enterprises ensure internet policy compliance. Through advanced, heuristic detection techniques, the FortiProxy Image Analyzer module ensures that even on websites that are considered legitimate or contain minimal content, the NSFW visual content continued to be identified, verified and managed effectively.

JOINT SOLUTION BENEFITS

- Ensure effective compliance and adherence to Acceptable Use Policies
- Detect NSFW visual content using advanced analysis techniques
- Halt users from viewing, sending, receiving or storing NSFW images on the network
- Ensure identification of visual NSFW content even from legitimate websites
- Ensure identification of NSFW content on websites with little or no text
