

NSE 2 - The Fortinet Security Fabric

NSE 2 is the core solutions level of the Fortinet Network Security Expert (NSE) program.

In this course, you will learn the current **Fortinet Security Fabric** messaging, and how the nine core elements combine to create a broad integrated, and automated solution to today's complex and ever-changing threat landscape.

Becoming proficient in the Security Fabric messaging is key to landing new accounts, expanding into existing accounts, and maintaining long-term customer relationships.

Format

- Self-paced videos and quizzes

Agenda

1. The Fortinet Security Fabric
2. Network Security
3. Multi-Cloud Security
4. Web Application Security
5. Email Security
6. Advanced Threat Protection
7. Secure Unified Access
8. Endpoint Security

10. Support & Services

Objectives

After completing this course, you will be able to describe the following attributes of the Fortinet Security Fabric:

- High-level description and value proposition
- The nine core elements and how they work together
- Broad visibility into the digital attack surface
- Integrated Detection of advanced threats
- Automated response and continuous trust assessment.

Who Should Attend?

Fortinet Sales employees and channel partners are required to complete all ten lessons to obtain NSE 2 level certification. All other Fortinet employees are encouraged to complete this course along with NSE 1 and NSE 3.

This course **is not** available to customers or the general public.

Prerequisites

- Basic understanding of firewall concepts
- NSE 1 – The Threat Landscape course is recommended

Certification

This course completes the requirement to obtain the NSE 2 certification level. The NSE 2 certification is valid for two years from the date of completion.
