

From the Desk of Rob Rashotte

The NSE Training Institute has been dedicated to evolving cybersecurity certification since its inception. Growing from two certifications to an eight level Network Security Expert (NSE) program with nearly 400 hours of training curriculum and more than ½ million NSE certifications issued has reinforced the need, but also the desire, to pursue careers in cybersecurity.

Our commitment to close the cybersecurity skills gap has driven us to expand our ecosystem to meet this demand. We've grown our global network to more than 80 Authorized Training Centers (ATCs), 400 academic partners and over 20 non-profit organizations supporting diversity and inclusion within the cybersecurity industry.

We are proud of the quality improvements and program expansion that we've developed over the years and continue to do so to meet the needs of the cybersecurity industry and of our customers and partners.

Rob Rashotte
Vice President, Global Training & Technical Field Enablement at Fortinet

Course & Exam Updates

Instructor-Led and Self-Paced Courses

Courses released since March 1, 2021

NSE 2

- [The Evolution of Cybersecurity: SASE](#) (Self-Paced)

NSE 4

- [FortiGate Security 7.0](#) (Eligible for up to 21 (ISC)² credits)
- [FortiGate Infrastructure 7.0](#) (Eligible for up to 14 (ISC)² credits)

NSE 6

- [Secure Wireless LAN 6.4](#) (Eligible for up to 4.4 (ISC)² credits)
- [FortiMail 6.4](#) (Eligible for up to 18.2 (ISC)² credits)

NSE 7

- [OT Security 6.4](#) (Eligible for up to 21 (ISC)² credits)
- [FortiSOAR Design & Development](#) (Eligible for up to 21 (ISC)² credits)

NSE Training Institute Highlights

FortiOS 7.0 Instructor-Led Training

FortiOS 7.0 tackles some of today's biggest security challenges related to work from home, securing the SASE edge, and more.

The new NSE 4 FortiGate Security 7.0 and FortiGate Infrastructure 7.0 courses cover some of the most important new features added to FortiOS 7.0, such as Carrier Grade NAT, SSL inspection enhancements, Video Filtering, SD-WAN zones, Security Fabric support in multi-VDOM environments, and a new HA failover method, and more.

Learn more about [NSE 4](#).

NSE 7: Advanced Administration and Support of Security Infrastructures

Develop advanced skills in designing, implementing, supporting and integrating multiple Fortinet products. NSE 7 is comprised of eight courses. NSE 7 SD-WAN and NSE 7 Advanced Analytics were added last year and NSE 7 OT Security and NSE 7 FortiSOAR Design and Development have been released this year.

New NSE Training Lab Platform

A new consistent and uniform interface for students and instructors. Benefits include:

- Direct HTTP connection to graphical interfaces of Fortinet devices
- Transparent support for international keyboards
- Full-screen resizable access to all the VMs
- Fully integrated with the NSE Training Institute
- Cost-effective lab rental fees

Ask us how to purchase your on-demand lab access within the self-paced courses - training@fortinet.com.

Fortinet 2021 State of Operational Technology and Cybersecurity Report

The report illuminates where OT is most vulnerable, the types of cyberattacks organizations face, current security tactics, and the areas where cybersecurity protocols need improvement. Read the [report](#).
