Many organizations wanting to protect themselves against the risk of data breach are overwhelmed by vendor claims and alleged “silver bullets.” That’s why Fortinet is committed to participation in real-world, independent 3rd party testing so customers can see how we compare to alternative solutions out there. The value of FortiGuard Labs’ depth and breadth of research, intelligence and analytics becomes apparent in these test results.

**Validated Protection**

**NGFW**

Fortinet Threat Intelligence and Security Solutions Receive Top Industry Ratings...

Fortinet’s network security platform is tested and validated by the world’s leading experts and customers globally. On the clock 24/7, around the world, FortiGuard Labs threat research and response experts help organizations thwart sophisticated threats that may go undetected by other solutions.

**Breach Detection**

Virus Bulletin - December 2014

“Detection was once again very strong in the response sets, dropping away a little into the proactive sets but remaining respectable. The core certification sets were handled well, and Fortinet earns another VB100 award.”
Unparalleled Third Party Certification

Fortinet believes that independent, third-party tests are a critical measure of the quality of a product. This is why we consistently submit our products and technologies to the largest number of third party independent tests for evaluation.

Leading Industry Collaboration

Fortinet co-founded the Cyber Threat Alliance to foster collaboration across the industry with the aim to improve overall protection levels for every organization. FortiGuard Labs works with the Cyber Threat Alliance, other industry leaders, and government agencies to deliver state of the art research and protection.

We Take Care of Security, So You Can Take Care of Business

Fortinet security solutions, powered with our latest ASICs, deliver the industry’s best performance and scale, while securing and simplifying your IT infrastructure with the threat intelligence of FortiGuard Labs.

Fortinet is uniquely able to detect and stop threats both inside the perimeter and outside—without compromising the performance of your network.

("With a network like ours and the demands that are placed on it, there is no room for second-best security. Fortinet delivers high-performance enterprise firewalling that enables us legitimate traffic in so the business can keep running.

— Mark Graff, Global Chief Information Security Officer, NASDAQ OMX
