- Symantec Blue Coat ProxySG v6.6.5.1
- Barracuda Web Application Firewall¹
- Imperva SecureSphere Web Application Firewall²

¹ Due to an apparent hardware failure and time constraints, NSS Labs was unable to test the Barracuda product. No investigation into the possible cause has been performed at this time. NSS appreciates the cooperation and effort from Barracuda and looks forward to testing soon.

² Despite multiple attempts to engage with Imperva, this vendor refused to allow its device to be tested. Multiple attempts by NSS Labs to procure the Imperva product were unsuccessful, and sales were repeatedly blocked by Imperva. If you would like to see the results of testing for the Imperva product, please coordinate with NSS to schedule testing of this product.
